Question: 1

A company plans to migrate to Microsoft 365.

You need to advise the company about how Microsoft provides protection in a multitenancy environment.

What are three ways that Microsoft provides protection? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Customer content at rest is encrypted on the server by using BitLocker.
- B. Microsoft Azure AD provides authorization and role based access control at the tenant layer.
- C. Customer content at rest is encrypted on the server by using transport layer security (TLS).
- D. Microsoft Azure AD provides authorization and role based access control at the transport layer.
- E. Mailbox databases in Microsoft Exchange Online contain only mailboxes from a single tenant.
- F. Mailbox databases in Microsoft Exchange Online contain mailboxes from multiple tenants.

Answer: A,B,F

Explanation:

A: <https://docs.microsoft.com/en-us/microsoft-365/compliance/office-365-encryption-in-the-microsoft-cloud-overview?view=o365-worldwide>

B: <https://docs.microsoft.com/en-us/microsoft-365/enterprise/microsoft-365-tenant-isolation-overview?view=o365-worldwide>

F: <https://docs.microsoft.com/en-us/microsoft-365/enterprise/microsoft-365-isolation-in-microsoft-365?view=o365-worldwide>

Question: 2

You are the Microsoft 365 administrator for a company.

Your company plans to open a new office in the United Kingdom.

You need to provide penetration test and security assessment reports for the new office.

Where can you locate the required reports?

- A. Data Governance page of the Security and Compliance portal.
- B. Compliance Manager page of the Services Trust portal
- C. Data Loss Prevention page of the Security and Compliance portal
- D. Regional Compliance page of the Services Trust portal

Answer: D

Explanation:

Question: 3

HOTSPOT

An organization plans to deploy Microsoft Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes No

Data protection can be selectively applied to applications.

☐☐

Microsoft intune can define where corporate data is stored.

☐☐

Once a device is registered with Microsoft Intune, device wipe will include the user's personal data

☐☐

Explanation:

Statement

Yes No
Answer:

Data protection can be selectively applied to applications.

☒☐

Microsoft intune can define where corporate data is stored

☒☐

Once a device is registered with Microsoft Intune, device wipe will include the user's personal data.

☐☒

Question: 4

DRAG DROP

Your company has a Microsoft 365 subscription.

You need to implement security policies to ensure that sensitive data is protected.

Which tools should you use? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Scenario	
Compliance Manager	Use the Microsoft Authenticator app to enable multi-factor authentication.	Tool
Identity and access management (IAM)	Classify documents to restrict permission to content.	Tool
Information rights management (IRM)	Use a dashboard for data-protection recommendations. Provide auditors and regulators with reports on data-protection status.	Tool

Answer:

Explanation:

Scenario

Use the Microsoft Authenticator app to enable multi-factor authentication.

Information rights management (IRM)

Classify documents to restrict permission to content.

Information rights management (IRM)

Use a dashboard for data-protection recommendations

Compliance Manager

Provide auditors and regulators with reports on data-protection status.

Compliance Manager

Question: 5

HOTSPOT

You are planning a Microsoft AzureAD solution for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes

No

You can manage Azure AD-joined machines by using group policy. ☐

☐

Azure AD requires integration with Active Directory Domain

☐ ☐

Services by using secure lightweight Directory Access Protocol (LDAP).

Azure AD supports Azure AD Authentication Library (ADAL) authentication.

O O

Answer:

Explanation:

Yes – <https://docs.microsoft.com/en-us/azure/active-directory-domain-services/manage-group-policy> Settings for user and computer objects in Azure Active Directory Domain Services (Azure AD DS) are often managed using Group Policy Objects (GPOs).

Yes – <https://docs.microsoft.com/en-us/azure/active-directory-domain-services/tutorial-configure-ldaps> To communicate with your Azure Active Directory Domain Services (Azure AD DS) managed domain, the Lightweight Directory Access Protocol (LDAP) is used. By default, the LDAP traffic isn't encrypted, which is a security concern for many environments.

Yes – <https://docs.microsoft.com/en-us/azure/active-directory/azuread-dev/active-directory-authentication-libraries> The Azure Active Directory Authentication Library (ADAL) v1.0 enables application developers to authenticate users to cloud or on-premises Active Directory (AD), and obtain tokens for securing API calls.

Question: 6
HOTSPOT

You are a Microsoft 365 administrator for a company. The company implements federated authentication.

For each of the following statement, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes No

Users have the same passwords in the cloud and on-premises.

Q

Q

Users must sign in again when using Microsoft 365.

O

O

You can configure federated authentication to require a smart card

Answer:

Explanation:

Statement

Yes

No

Users have the same passwords in the cloud and on-premises.

☐☐

Users must sign in again when using Microsoft 365.

☐☐

You can configure federated authentication to require a smart card.

☐☐

Question: 7

DRAG DROP

A company plans to migrate to a hybrid cloud infrastructure.

You need to determine where to manage the environment after the migration is complete.

Match each item to the location where it will be managed. To answer, drag the appropriate item from the column on the left to its location on the right. Each item may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Configuration locations**Option**

Microsoft 365 only
on-premises only
both Microsoft 365 and on-premises

Configure multi-factor authentication for cloud services.

Configure email disclaimers.

Configure compliance.

Set frequency of Microsoft Office 365 updates.

Configuration location

Configuration location

Configuration location

Configuration location

Answer:

Explanation:

Option

Configure multi-factor authentication for services.

Configure email disclaimers.

Configure compliance.

Set frequency of Microsoft Office 365 updates.

both Microsoft 365 and on-premises

both Microsoft 365 and on-premises

Microsoft 365 only

on-premises only

Question: 8

HOTSPOT

You are a Microsoft 365 administrator.

You need to implement the appropriate features for each scenario.

What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Scenario

Restrict access to Microsoft Outlook by using a PIN.

Mobile application protection policy
Device configuration policy

Secure members of the Global Administrators group by using dynamic risk profiles.

Microsoft Azure AD Identity Protection
Microsoft Azure AD Conditional Access
Microsoft Azure AD Privilege Identity Management

Secure admin roles by requiring approvals.

Microsoft Azure AD Identity Protection
Microsoft Azure AD Privilege Identity Management
Microsoft Azure AD Domain Services

Answer:

Explanation:

Scenario

Restrict access to Microsoft Outlook by using a PIN.

Mobile application protection policy
Device configuration policy

Secure members of the Global Administrators group by using dynamic risk profiles.

Microsoft Azure AD Identity Protection
Microsoft Azure AD Conditional Access
Microsoft Azure AD Privilege Identity Management

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure>

Question: 9

Your organization plans to deploy Microsoft 365 in a hybrid scenario.

You need to ensure that employees can use a smart card for authentication.

Which hybrid identity solution should you implement?

- A. password hash synchronization with single sign on
- B. Active Directory federation Services (AD FS)
- C. Ping federate and federation integration
- D. pass-through authentication and single sign-on

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

Question: 10

HOTSPOT

You implement Microsoft Azure Information Protection.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes

No

You can supplement the default templates to apply restrictive controls.

☐☐

Classification and protection information is available for on-premises file servers.

☐☐

Installing the Azure Information Protection client installs an information protection bar to Microsoft Excel.

☐☐

Answer:

Explanation:

Statement

Yes

No

You can supplement the default templates to apply restrictive controls.

☒☐

Classification and protection information is available for on-premises file servers.

☒☐

Installing the Azure Information Protection client installs an information protection bar to Microsoft Excel.

☒☐

Reference:

<https://docs.microsoft.com/en-us/azure/information-protection/what-is-information-protection>

<https://docs.microsoft.com/en-us/azure/information-protection/rms-client/client-classify-protect>

Question: 11

DRAW DROP

An organization plans to deploy Microsoft 365 in a hybrid scenario.

You need to provide a recommendation based on some common identity and access management scenarios. The solution must minimize costs.

Match each solution to its appropriate scenario. To answer, drag the appropriate solutions from the column on the left to the scenarios on the right. Each solution may be used once, more than once, or not at all. Each correct match is worth one point.

NOTE: Each correct selection is worth one point.

Solutions

Active Directory Federation Services (AD FS)
PingFederate and federation integration
Password hash synchronization with single sign-on
Pass-through authentication and single sign-on

Enable a federation option for authentication in a hybrid environment.

Allow administrators to reset user passwords in Microsoft Azure AD.

Support nonfederated users authenticating with on-premises AD and supports multi-factor authentication.

Solution

Solution
Solution
Solution

Answer:

Explanation:

Solution

Enable a federation option for authentication in a hybrid environment.

Allow administrators to reset user passwords in Microsoft Azure AD.

Support nonfederated users authenticating with on-premises AD and supports multi-factor authentication.

Active Directory Federation Services (AD FS)

Password hash synchronization with single sign-on

Pass-through authentication and single sign-on

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-pta>

Question: 12

You are the Microsoft 365 administrator for a company.

An employee requests personal data under General Data Protection Regulation (GDPR) guidelines.

You need to retrieve data for the employee.

What should you do?

- A. Create a data subject request case.
- B. Create a retention policy.
- C. Create a data-loss prevention policy.
- D. Create a GDPR assessment

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/gdpr-dsr-office365>

Question: 13

HOTSPOT

A company plans to deploy Microsoft Intune.

Which scenarios can you implement by using Intune? To answer, select the appropriate answer for the given scenarios.

NOTE: Each correct selection is worth one point.

Scenario	Yes	No
Intune app protection policies can protect access to Exchange Server on-premises mailboxes.	☐	☐
Intune app protection policies support apps that connect to on-premises Microsoft SharePoint Server.	☐	☐
Intune app protection policies require a mobile-device management (MDM) solution.	☐	☐

Answer:

Explanation:

Scenario: Intune app protection policies can protect access to Exchange Server on-premises mailboxes.

Yes

No

Intune app protection policies support apps that connect to on-premises Microsoft SharePoint Server.

Intune app protection policies require a mobile-device management (MDM) solution.

Reference:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

Question: 14

DRAG DROP

You have a hybrid environment that includes Microsoft Azure AD. On-premises applications use ActiveDirectory Domain Services (AD DS) for authentication.

You need to determine which authentication methods to use.

Match each feature to its authentication source. To answer, drag the appropriate authentication sources from the column on the left to the client features on the right. Each authentication source may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Authentication sources

AD DS only

Azure AD only

AD DS and Azure AD

Client feature

Log on to devices by using Windows Hello.

Log on to devices that are managed by Microsoft Intune.

Sign in to Outlook on the web by using multi-factor authentication.

Authentication sources

Authentication sources

Authentication sources

Authentication sources

Explanation:

Remain on-premises

You need to deploy an external-facing website.

Migrate to the cloud

You need to deploy a Microsoft SharePoint collaboration site for partners.

Migrate to the cloud

Question: 18

You are the Microsoft 365 administrator for a company.

Users in the IT department must receive new Office 365 preview features before the features are deployed to other users in the company.

You need to ensure only the users in the IT department receive preview features.

Which two actions should you perform? Each correct answer represents part of the solution. (Choose two.)

NOTE: Each correct selection is worth one point.

- A. Instruct users to navigate to <http://insider.office.com> and sign up for Office Insider.
- B. Instruct users to update Office ProPlus.
- C. In the organizational profile, set the update preference to Targeted release for selected users.
- D. Instruct users to uninstall Office ProPlus and then reinstall the software.
- E. In the organizational profile, set the update preference to Standard release.

Answer: A,C

Explanation:

Reference:

<https://insider.office.com/en-us/>

<https://docs.microsoft.com/en-us/office365/admin/manage/release-options-in-office-365?view=o365-worldwide>

Question: 19

A company is a Microsoft 365 reseller. The company does not provide managed services or direct customer support. You need to provide licenses for customers and earn commissions for each license sold. What should you do?

- A. Buy licenses for customers by using the Microsoft admin portal
- B. Sign up as a Cloud Solution Provider direct reseller.
- C. Sign up as a Cloud Solution Provider indirect reseller.
- D. Buy licenses for customers from a Microsoft authorized distributor.

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/partner-center/indirect-reseller-tasks-in-partner-center>

"As an indirect reseller in CSP, you work with indirect providers (also known as distributors) who have a direct relationship with Microsoft and can provide you with customer support and billing. Working with indirect providers means you don't have to start your own. Instead, you can work with an experienced technology provider to help ensure your success. In the provider-reseller (two-tier) model, the provider buys cloud solutions and services from Microsoft.

You then resell them to customers."

Question: 20

A company that has 50 employees plans to purchase a Microsoft 365 Business subscription. Which two payment methods are available? Each correct answer presents a complete solution NOTE: Each correct selection is worth one point.

- A. PayPal
- B. automatic bank transfer
- C. Enterprise Agreement
- D. credit card or debit card

Answer: B,D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/admin/subscriptions-and-billing/pay-for-your-subscription?view=o365-worldwide>

Question: 21

A company has 250 employees.

You need to migrate all users to Microsoft 365 and meet the following requirements:

Provide user-centric licensing solution for all users.

Manage devices from a single location.

Minimize licensing costs.

Which licensing model should you use?

- A. Microsoft 365 Business
- B. Microsoft 365 Education
- C. Microsoft 365 Enterprise E3
- D. Microsoft 365 Enterprise E5

Answer: A

Explanation:

Reference:

<https://products.office.com/en-za/compare-all-microsoft-office-products?tab=2>

Question: 26

You are the Microsoft 365 administrator for a company.

Your company wants to learn more about what happens if the availability of the Microsoft Office 365 services is not met.

Where can you find this information?

- A. Service Level agreement
- B. Microsoft Services agreement
- C. Microsoft Cloud agreement
- D. Microsoft Products and Services agreement
- E. Microsoft Enterprise agreement

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-level-agreement>

Question: 27

DRAG DROP

You are a member of a Microsoft Office 365 group named Sales. You create a proposal for a customer by using Word Online.

All team members must be able to review and make changes to the proposal at the same time. After the proposal is completed, you must share the final document with the customer in read-only format.

You need to ensure that the customer sees the most recent versions of the document.

Actions

Add the proposal to the Sales team site in SharePoint Online.

Create a sharing link to the proposal with read-only access.

Add the proposal to OnDrive for Business.

Email the customer and include the proposal as an attachement.

Email the customer and include the link to the document.

Steps

Answer:

Explanation:

Add the proposal to the Sales team site in SharePoint Online.

Create a sharing link to the proposal with read-only access.

Email the customer and include the proposal as an attachement.

<https://docs.microsoft.com/en-us/office365/admin/setup/set-up-file-storage-and-sharing?view=o365-worldwide>

Question: 28

You are the Microsoft 365 administrator for a company.

You install Microsoft Office 365 ProPlus on five devices. You deactivate one device.

Which task can you perform on the deactivated device?

- A. Print a document.
- B. Leave a comment in a document.
- C. Start a new document from a template.
- D. Set properties on a document.

Answer: A

Explanation:

Reference:

https://blogs.technet.microsoft.com/office_resource_kit/2014/01/17/office-365-proplus-multiple-devices-and-deactivation/

When you deactivate a Microsoft Office 365 ProPlus license, Office 365 ProPlus remains installed on the computer, but you can only view and print documents. All features for editing or creating new documents are disabled.

Reference:

<https://docs.microsoft.com/en-us/deployoffice/overview-of-licensing-and-activation-in-office-365-proplus>

Question: 29

DRAG DROP

A company plans to deploy collaboration tools for employees. The company does not plan to deploy a hybrid environment.

You need to identify the features that are available in Teams and Skype for Business Server.

Match each environment to its feature. To answer, drag the appropriate environment from the column on the left to the features on the right. Each environment may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Question: 30

HOTSPOT

For each of the following statements, select Yes if the statement is true. otherwise, select No.

NOTE:Each correct selection is worth one point.

Statement

Yes No

You can assign apps to devices that are not enrolled with Microsoft Intune.

☐☐

You can assign wrapped apps, or apps that incorporate the Intune SDK, only if the device is enrolled with Intune.

☐☐

You can install available apps from the web-based Company Portal app regardless of whether the device is enrolled with Intune.

☐☐

Answer:

Explanation:

Statement

Yes

No

You can assign apps to devices that are not enrolled with Microsoft Intune. Q

You can assign wrapped apps, or apps that incorporate the Intune SDK, only if the device is enrolled with Intune.

You can install available apps from the web-based Company Portal app regardless of whether the device is enrolled with Intune.

<https://docs.microsoft.com/en-us/intune/apps-deploy>

Question: 31

This question requires that you evaluate the bold text to determine if it is correct.

A company needs to protect documents and emails by automatically applying classifications and labels. You must minimize costs. You should implement Microsoft Azure Information Protection for Microsoft Office 365.

Review the underlined text. If it makes the statement correct, select No change is needed. If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change needed.
- B. Azure Information Protection Premium P2
- C. Azure Information Protection Premium P1
- D. Microsoft 365 E3

Answer: B

Explanation:

Reference:

<https://products.office.com/en-za/business/azure-information-protection-for-office-365>

Question: 32

DRAG DROP

You are the Microsoft 365 administrator for a company.

You need to identify the different features of MyAnalytics and Workspace Analytics.

What are the different features? To answer, drag the appropriate applications to the correct features. Each application may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Applications	Feature	Application
MyAnalytics	Included in office 365 E5 license	Application
Workspace Analytics	Can be purchased only as an add-on license	Application
	Provides employee work and collaboration : metrics	Application
	Permits upload of custom organizational data 1	Application
	Provides team work and collaboration metrics	Application

Answer:

Explanation:

Feature

Application

Included in office 365 E5 license

MyAnalytics

Can be purchased only as an add-on license

Workspace Analytics

Provides employee work and collaboration metrics

MyAnalytics

Permits upload of custom organizational data

Workspace Analytics

Provides team work and collaboration metrics

Workspace Analytics

<https://docs.microsoft.com/en-us/office365/servicedescriptions/workplace-analytics-service-description>

<https://docs.microsoft.com/en-us/workplace-analytics/setup/upload-organizational-data>

Question: 33

You use Microsoft 365 Usage Analytics.

You need to know the number of users who are active today and were also active last month.

Which metric should you use?

- A. MoMReturningUsers
- B. EnabledUsers
- C. ActiveUsers
- D. CumulativeActiveUsers

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/admin/usage-analytics/active-user-in-usage-reports?view=o365-worldwide>

Question: 34

ION NO: 36

Your organization plans to deploy a subscription-based licensing model of Microsoft Office to devices.

You must use group policy to enforce Office application settings.

You need to deploy Office to the enterprise.

Which version of Office should you deploy?

- A. Office 365 ProPlus
- B. Office Professional Plus 2016
- C. Office Online
- D. Office Home and Business 2016

Answer: A

Explanation:

Reference:

<https://products.office.com/en-za/business/compare-more-office-365-for-business-plans>

Question: 35

HOTSPOT

An organization has a Microsoft 365 subscription. You plan to implement multi-factor authentication.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes

No

After users are enrolled in multi-factor authentication, they must configure a Q second authentication factor the next time they sign in.

Enabling multi-factor authentication requires an additional subscription purchase.

Complete multi-factor authentication by using text messages, a smartphone app, or a phone call.

Answer:

Explanation:

Statement

Yes

No

After users are enrolled in multi-factor authentication, they must configure a second authentication factor the next time they sign in.

Enabling multi-factor authentication requires an additional subscription purchase.

Complete multi-factor authentication by using text messages, a smartphone app, or a phone call.

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/multi-factor-authentication-for-your-office-365-dev-test-environment>

Question: 36

An organization plans to deploy Microsoft Office 2019 or Office 365 ProPlus.

What are two advantages of Office 365 ProPlus? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point

- A. Features remain constant through the lifetime of the applications.
- B. Office 365 ProPlus includes downgrade rights.
- C. A single license may be deployed to multiple devices.
- D. Fully functional Office mobile apps are free to install and use.

Answer: C,D

Explanation:

A single subscription of Office 365 ProPlus allows you to install Office 365 on up to 5 devices.

Office 365 ProPlus includes a fully functional, cloud-based online version that is free to use, though it does not require any installation.

Question: 37

DRAG DROP

You are the Microsoft 365 administrator for a company.

Which Microsoft 365 components should employees use?

Match each component to its task. To answer, drag the appropriate components from the column on the left to the tasks on the right. Each component may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Components	Task	Components
Windows 10 Enterprise	Send an email to a distribution list.	component
Microsoft Exchange Online	Author a document at the same time as someone else and use document versioning.	component
Microsoft SharePoint Online	Hold a voice and video conversation with other employees.	component
Microsoft Teams	Register a personal device with the company.	component
Microsoft Enterprise Mobility + Security	View a personal calendar.	component

Answer:

Explanation:

Task

Components

Send an email to a distribution list.

Microsoft Exchange Online

Author a document at the same time as someone else and use document versioning.

Microsoft SharePoint Online

Hold a voice and video conversation with other employees.

Microsoft Teams

Register a personal device with the company. Microsoft Enterprise Mobility + Security

View a personal calendar.

Microsoft Exchange Online

Question: 38

DRAG DROP

Your organization is considering subscribing to Microsoft 365.

You need to educate stakeholders about how Microsoft 365 component enable effective collaboration.

Match each Microsoft 365 service to the most appropriate service description. To answer, drag the appropriate services to the correct descriptions. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct match is worth one point.

Services	Descriptions	Service
Microsoft Teams	A chat based workspace that facilitates real-time collaboration and enables members of an organization to have conversations and create work plans.	Service
OneDrive for Business		
SharePoint Online	A cloud service that enables you to store and protect files, share files with others, access files from anywhere on all devices, and restore files to an earlier date.	Service
Microsoft Yammer		
Office 365 ProPlus	A service that enables you to store, organize, share, add third-party apps, and access information from all,ost any device by using a web browser.	Service
		1
	A private social network that you can use to efficiently resolve support issues and gather feedback on projects I and documents.	Service

Answer:

Explanation:

Services	Descriptions	Service
Microsoft Teams	A chat based workspace that facilitates real-time collaboration and enables members of an organization to have conversations and create work plans.	Microsoft Teams

Question: 42

DRAG DROP ON NO: 44 DRAG DROP

You are implementing Azure cloud services.

Match each scenario to its service. To answer, drag the appropriate scenario from the column on the left to its cloud service on the right. Each scenario may be used only once.

NOTE: Each correct selection is worth one point.

Scenarios	Service	Scenario
Custom web and mobile application securely connected to an on-premises data store	Software as a service (SaaS)	Scenario
Exchange Online integrated with on-premises Skype for Business Server	Platform as a service (PaaS)	Scenario
Server-based workloads on a virtual machine that are connected to an on-premises network	Infrastructure as a service (IaaS)	Scenario

Answer:

Explanation:

Service

Scenario

Software as a service (SaaS)

Exchange Online integrated with on-premises Skype for Business Server

Platform as a service (PaaS)

Custom web and mobile application securely connected to an on-premises data store

Infrastructure as a service (IaaS)

Server-based workloads on a virtual machine that are connected to an on-premises network

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/hybrid-cloud-overview>

Question: 43

You need to identify which Microsoft platforms provide hybrid capacities for migrating from an on-premises deployment. Which two platforms provide hybrid capabilities for migration? Each correct answer provides a complete solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Skype for Business
- B. Microsoft Yammer
- C. Microsoft Exchange
- D. Microsoft Teams

Answer: A,C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/architecture-of-microsoft-hybrid-cloud-scenarios>

Question: 44

A company is moving to Microsoft Azure. Some applications cannot be moved.

You need to identify which application will remain in a hybrid environment after the migration. Which applications will remain in a hybrid environment?

- A. applications that manage sensitive information
- B. applications that use a USB token device to control access
- C. legacy applications that use a message-based interface
- D. a new server that runs several line-of-business applications

Answer: A

Explanation:

Question: 45

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statement

Yes

No

Microsoft cloud services offer significant energy savings for Microsoft and its customers.

Lower costs, no hardware maintenance, near-unlimited scalability, and high reliability are all advantages of a private cloud.

Microsoft cloud services offer security options and have the ability to provision resources quickly.

Answer:

Explanation:

Answer Area

Statement

Yes

No

Microsoft cloud services offer significant energy savings for Microsoft and its customers.

Lower costs, no hardware maintenance, near-unlimited scalability, and high reliability are all advantages of a private cloud.

0

0

Microsoft cloud services offer security options and have the ability to provision resources quickly.

Question: 46

A company is purchasing a Microsoft 365 subscription to replace the current on premises IT infrastructure.

You need to identify the impacts of subscribing to Microsoft 365.

Which three outcomes can the company expect? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Predictable Microsoft licensing costs
- B. Increased Exchange Server Client Access license (CAL) costs
- C. Increased Windows Server Client Access License (CAL) costs
- D. Increased service scalability
- E. Decreased on-premises infrastructure maintenance

Answer: A,D,E

Explanation:

Question: 47

DRAG DROP

You are the Microsoft 365 administrator for a company.

You must provide infrastructure recommendations. All proposed solutions must minimize costs.

You need to identify the appropriate cloud model for the given scenarios.

Which cloud models should you use? To answer, drag the appropriate cloud models to the correct

requirements. Each cloud model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer area

Cloud models

Private
Public
Hybrid

Requirement

Provide an on-demand sandbox environment.

Provide failover capabilities between resources that you manage and resources in other regions.

Deploy virtual machines that supports USB devices.

Cloud model

Cloud model
Cloud model
Cloud model

Answer:

Explanation:

on demand Sandbox environment- PUBLIC
failover capabilities-HYBRID
VMs that support USB devices- PRIVATE

Question: 48

You are the Microsoft 365 administrator for a company.

The company runs SharePoint Server and Exchange Server in an on-premises datacenter. The site collection for the finance department is currently encrypted using third party software.

You need to move as many services to Microsoft 365 as possible.

What should you do?

- A. Migrate all SharePoint data and Exchange mailboxes to Microsoft 365.
- B. Leave SharePoint data for finance department users on-premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.
- C. Leave mailboxes for finance department users on-premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.
- D. Leave SharePoint data and mailboxes for finance department users on premises. Migrate all other SharePoint data and Exchange mailboxes to Microsoft 365.

Answer: A

Explanation:

Question: 49

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Compliance Manager performs an assessment against your entire Microsoft 365 environment and evaluates both Microsoft and customer controls.	☐	☐
Compliance Manager allows you to assign individuals within the organization to be responsible for the control.	☐	☐
Compliance Manager provides the ability to take corrective actions from within the Service Trust portal.	☐	☐

Answer:

Explanation:

Compliance Manager performs an assessment against your entire Microsoft 365

Question: 53

A company assigns a Microsoft 365 license to each employee.

You need to install Microsoft Office 365 ProPlus on each employee device.

Which three methods can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Use System Center Configuration Manager (SCCM) to deploy Office 365 ProPlus from a local distribution source.
- B. Use System Center Configuration Manager (SCCM) to deploy Office 365 ProPlus from an Office Windows Installer (MSI) package.
- C. Download the Office 365 ProPlus Windows Installer (MSI) package. Install Office 365 ProPlus from a local distribution source.
- D. Use the Office Deployment Tool (ODT) to download installation files to a local distribution source. Install Office 365 ProPlus by using the downloaded files.
- E. Enable users to download and install Office 365 ProPlus from the Office 365 portal.

Answer: A,D,E

Explanation:

<https://docs.microsoft.com/en-us/deployoffice/plan-microsoft-365-apps>

Question: 54

When you enable external access by using the Microsoft 365 admin portal, data is available to anonymous users.

Review the Bold text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change needed.
- B. the Everyone group is applied to all shares with full control
- C. you must configure Active Directory Federation Services (AD FS)
- D. users can send sharing invitations for specific content

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/sharepoint/external-sharing-overview>

Question: 55

You are the Microsoft 365 administrator for a company. You deploy Windows 10 to all devices by using Windows Autopilot.

You need to ensure that employees can install Microsoft Office 365 ProPlus on their devices.

What are two possible ways to achieve this goal? Each correct answer presents a part of a solution. NOTE: Each correct selection is worth one point.

- A. Use the self-install option on the Office 365 dashboard
- B. Download and install the Office ProPlus Windows Installer (MSI) package
- C. Enable auto-deployment of Office 365 apps for all devices
- D. Update the Windows AutoPilot deployment profile to include the Office 365 apps

Answer: A,C

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-deployment-rings-windows-10-updates>

Question: 59

You are the Microsoft 365 administrator for an organization.

A group of employees and users outside the company must be able to collaborate on a project in real time by using a whiteboard.

In the Microsoft 365 admin portal, which Office 365 product should you configure?

- A. Microsoft Yammer
- B. Microsoft Office Delve
- C. Microsoft SharePoint Online
- D. Microsoft Teams

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/manage-whiteboard>

Question: 60

You need to reduce the amount of time that the IT team spends on user support.

What are three possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Enable Microsoft Office 365 Customer Lockbox
- B. Upgrade all client devices to Windows 10
- C. Use Windows AutoPilot to deploy devices
- D. Deploy Microsoft MyAnalytics to devices

E. Deploy Microsoft Office 365 Professional Plus to all client devices

Answer: A, C, E

Explanation:

Question: 61

A company has a Microsoft 365 subscription. Employees use personal devices to access company data in the cloud.

You need to restrict employees from copying data to personal OneDrive folders.

What should you use?

- A. Information Rights Management
- B. Microsoft Azure SecurityCenter
- C. Office 365 Advanced Threat Protection
- D. Intune App Protection

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

Question: 62

This question requires that you evaluate the bold text to determine if it is correct.

You use Microsoft Intune for device management. You must determine how many devices run each **operating system**.

You must launch Intune and navigate to the **Mobile Appsblade**.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. Device configuration
- B. Device **compliance**
- C. No change is needed
- D. **Devices**

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/device-inventory>

Question: 63

You are the Microsoft 365 administrator for a company. You need to ensure that users receive a **warning message** if they select links in emails that might be unsafe.

What should you do?

- A. Use Windows PowerShell to install the latest antimalware engine updates
- B. Enable Microsoft Office 365 Advanced Threat Protection
- C. Use the Microsoft Exchange Admin Center to configure a new spam-filter policy
- D. Use the Microsoft Exchange Admin Center to create a new antimalware policy

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/atp-safe-links>

Question: 64

You are a Microsoft 365 administrator for a company. Employees use Microsoft Office 365 ProPlus to create documents.

You need to implement document classification and protection by using Microsoft Azure Information Protection. Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

NOTE: Each correct selection is worth one point.

- A. Add an Azure subscription to your Microsoft 365 tenant
- B. Install the Azure Information Protection client
- C. Create a custom Azure Information Protection policy with the Confidential label
- D. Enable the default Azure Information Protection policy
- E. Install the Rights Management Service client

Answer: A,D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/information-protection/requirements>

<https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-default>

Question: 65

A company deploys Microsoft Azure AD. You enable multi-factor authentication.

You need to inform users about the multi-factor authentication methods that they can use.

Which of the following methods is NOT a valid multi-factor authentication method in Microsoft 365?

- A. Receive an automated call on the desk phone that includes a verification code
- B. Insert a small card in to a desktop computer and provide a PIN code when prompted
- C. Receive a call on a mobile phone and select the pound sign (#) when prompted
- D. Receive an SMS text message that includes a verification code

Answer: B

Explanation:

Reference:

<http://techgenix.com/multifactor-authentication-office-365/>

Question: 66

You are a Microsoft 365 administrator for a company.

Several users report that they receive emails which have a PDF attachment. The PDF attachment launches malicious code.

You need to remove the message from inboxes and disable the PDF threat if an affected document is opened.

Which feature should you implement?

- A. Microsoft Exchange Admin Center block lists
- B. Sender Policy Framework
- C. Advanced Threat Protection anti-phishing
- D. zero-hour auto purge
- E. DKIM signed messages with mail flow rules

Answer: D

Explanation:

Explanation Zero-hour auto purge (ZAP) is an email protection feature in Office 365 that retroactively detects and neutralizes malicious phishing, spam, or malware messages that have already been delivered to Exchange Online mailboxes. ZAP is available with the default Exchange Online Protection (EOP) that's included with any Office 365 subscription that contains Exchange Online mailboxes. ZAP doesn't work in standalone EOP environments that protect on-premises Exchange mailboxes <https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/zero-hour-auto-purge>

Question: 67

DRAG DROP

You are a Microsoft 365 administrator for a company.

A customer submits a data subject request (DSR) to delete customer information in compliance with General Data Protection Regulation (GDPR). You must place legal holds on related data whenever possible.

You need to respond to the request by searching for the customer's data in various Microsoft 365 tools.

How should you search for the data? To answer, drag the appropriate search methods to the correct Microsoft 365 applications. Each search method may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.

Answer Area

Search methods		Search method	
Content Search eDiscovery	Microsoft 365 application		
	Microsoft SharePoint Online		
	Microsoft Access		
	Microsoft Outlook		
In the app	Microsoft PowerApps		

Answer:

Explanation:

Microsoft 365 application Search method

Microsoft SharePoint Online | Content Search eDiscovery

Microsoft Access in the app

Microsoft Outlook Content Search eDiscovery

Microsoft PowerApps In the app

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/gdpr-dsr-office365#part-1-responding-to-dsrs-for-customer-data>

Question: 68

HOTSPOT

A company deploys Microsoft Intune.

An employee loses a Windows 10 device that contains corporate data.

You need to ensure that the corporate data on the device is secured as quickly as possible.

Which four options can you use? To answer, select the appropriate actions in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Question: 69

You are the Microsoft 365 administrator for a company.

All staff must use Microsoft Outlook to access corporate email. When users access Outlook on mobile devices, they must use a PIN to open the application.

You need to implement a Microsoft Intune policy to enforce the security requirements.

Which policy should you use?

- A. device compliance
- B. device configuration
- C. app protection
- D. app configuration

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

Question: 70

HOTSPOT

You need to configure a data governance solution for your company. The solution must meet the following requirements:

Classify documents

Ensure that classifications are enforced

Delete documents that are no longer used

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Action

Classify documents

Publish labels.
Define file and folder structures.
Apply Microsoft SharePoint permissions.

Ensure that classifications are enforced.

Apply supervision policies.
Configure document approval
Configure Microsoft Outlook Mail Tips.

Delete documents that are no longer used.

Apply retention policies.
Apply preservation policies.
Configure the Microsoft SharePoint second-stage recycle bin.

Answer:

Explanation:

Requirement

Action

Classify documents

Publish labels.

Question: 71

DRAG DROP

You are the Microsoft 365 administrator for a company.

You need to identify available cloud security features.

Match each feature to the correct description. To answer, drag the appropriate feature from the column on the left to its description on the right. Each feature may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Features	Description	Feature
Cloud Discovery dashboard	Provide insight into which apps are being used in the organization and the risk levels for the apps.	
Microsoft Azure AD Conditional Access	Classify and label emails and documents in the organization.	
Microsoft Azure Security Center	Block users from accessing cloud apps from certain devices.	
Microsoft Azure Information Protection	Manage security policies, monitor attacks against virtual machines, and provide remediation for vulnerabilities.	

Answer:

Explanation:

Description

Feature

Provide insight into which apps are being used in the organization and the risk levels for the apps.

Cloud Discovery dashboard

Classify and label emails and documents in the organization.

Microsoft Azure Information Protection

Block users from accessing cloud apps from certain devices.

Microsoft Azure AD Conditional Access

Manage security policies, monitor attacks against virtual machines, and provide remediation for vulnerabilities.

Microsoft Azure Security Center

<https://docs.microsoft.com/en-us/azure/security-center/security-center-virtual-machine-protection>

Question: 72

A company deploys Exchange Online and SharePoint Online.

You must audit and assessment report for the Microsoft 365 cloud services that the company uses.

You need to provide the required documents.

Which Microsoft site should you use to obtain this information?

- A. Compliance Manager
- B. Service Trust Portal
- C. Office 365 Security and Compliance Center
- D. Azure portal

Answer: B

Explanation:

Reference:

<https://servicetrust.microsoft.com/ViewPage/TrustDocumentsV3?docTab=7f51cb60-3d6c-11e9-b2af->

7bb9f5d2d913_FAQ_and_White_Papers

<https://docs.microsoft.com/en-us/microsoft-365/enterprise/microsoft-365-auditing-and-reporting-overview?view=o365-worldwide>

Microsoft cloud services include several auditing and reporting features you can use to track user and administrative activity within their tenant. Examples include changes made to Exchange Online and SharePoint Online tenant configuration settings, and changes made by users to documents and other items. You can use audit information and reports available in Microsoft cloud services to more effectively manage user experience, mitigate risks, and fulfill compliance obligations.

Security & Compliance Centers The Microsoft 365 Security & Compliance Center, Microsoft 365 Security Center, and Microsoft 365 Compliance Center are one-stop portals for protecting data in your organization, and they include many auditing and reporting features. These centers help you with your data protection or compliance needs and audit user and administrator activity. You can access these centers using your subscription admin account.

Question: 73

HOTSPOT

An organization migrates to Microsoft 365. The company has an on-premises infrastructure that includes Exchange Server and Active Directory Domain Services. Client devices run Windows 7.

You need to determine which products require the purchase of Microsoft 365 licenses for new employees.

Which product licenses should the company purchase? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Limited deployment for a small number of organizations for a short duration

Limited deployment for a short duration

Widespread deployment

Question: 75

You are the Microsoft 365 administrator for a company.

Which two admin roles can purchase more licenses? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. service administrator
- B. user management administrator
- C. global administrator
- D. billing administrator

Answer: C,D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/admin/subscriptions-and-billing/buy-licenses?view=o365-worldwide>

Question: 76

A company plans to purchase Microsoft 365 Enterprise licenses.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. through a Cloud Solution Provider (CSP)
- B. from the Microsoft website using a corporate credit card
- C. from the Microsoft retail store
- D. with an Enterprise Agreement (EA) subscription from Microsoft

Answer: A,D

Explanation:

Question: 77

You use Microsoft Business Products.

When you try to create a support request, you receive the following message:

You don't have permission to access this page or perform this action.

You need to determine the cause of the error message.

What is the cause?

- A. Your password is expired
- B. Your account is disabled
- C. Your company does not have Premier support
- D. Your account is not a member of the global admin role

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/admin/add-users/about-admin-roles?view=o365-worldwide>

Question: 78

A company experiences a Microsoft 365 outage that affects an entire region.

You check the Service Health Dashboard and observe that the service is healthy.

You need to find information in Service Health Dashboard that describes what happened during the Outage.

What should you use?

- A. Message Center
- B. incident closure summary
- C. Post-Incident Review (PIR)
- D. service request

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-health-and-continuity>

Question: 79

HOTSPOT

You are the Microsoft 365 administrator for a company.

You need to find all general availability features for SharePointOnline.

Which two options should you select on the Microsoft 365 Roadmap page? To answer, select the appropriate options in the answer area.

NOTE:Each correct selection is worth one point.

Answer Area

Question: 88

A company deploys Microsoft Azure AD. You run the Identity Secure Score report. The report displays five security items.

Which three security items on the report have the most impact on the score?

Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Enable policy to block legacy authentication.
- B. Enable user risk policy.
- C. Require multi-factor authentication for all users.
- D. Delete/block accounts not used in last 30 days.
- E. Do not expire passwords.

Answer: A,B,C

Explanation:

<https://docs.microsoft.com/es-es/microsoft-365/security/mtp/microsoft-secure-score?view=o365-worldwide>

Question: 89

You deploy Enterprise Mobility + Security E5 and assign Microsoft 365 licenses to all employees.

Employees must not be able to share documents at forward emails that contain sensitive information outside the company.

You need to enforce the file sharing restrictions.

What should you do?

- A. Use Microsoft Azure Information Protection to define a label. Associate the label with an Azure Rights Management template that prevents the sharing of files or emails that are marked with the label.
- B. Create a MicrosoftSharePoint Online content type named Sensitivity Apply the content type to other content types in Microsoft. 356 a Microsoft Azure Rights Management template that prevents the sharing of any content where the Sensitivity column value is set to Sensitive.
- C. C. Use Microsoft Azure Information Rights Protection to define a label. Associate the label with an Active Directory Rights Management template that prevents the sharing of files or emails that are marked with the label.
- D. Create a label named Sensitive. Apply a Data Layer Protection policy that notifies users when their document contains personally identifiable information (PII).

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/azure/information-protection/what-is-azure-rms>

Question: 90

DRAG DROP

An organization is moving toMicrosoft Azure and Microsoft 365.

You need to classify the following components:

website hosting

a virtual machine that runs Linux

document storage that uses OneDrive for Business

Match each component to its classification. To answer, drag the appropriate components from the column on the left to its classifications on the right. Each component may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Classifications	Component	Classification
Platform as a service (PaaS)	website hosting	
Software as a service (SaaS)	a virtual machine that runs Linux	
Infrastructure as a service (IaaS)	document storage that uses OneDrive for Business	

Answer:

Explanation:

Component	Classification
website hosting	Platform as a service (PaaS)
a virtual machine that runs Linux	Infrastructure as a service (IaaS)
document storage that uses OneDrive for Business	Software as a service (SaaS)

Question: 91

A company has a Microsoft 365 subscription. You deploy Windows 10 devices by using Windows Autopilot.

You need to ensure that team members can access data that is stored in OneDrive for Business when team members are at remote sites.

What should you do?

- A. Enroll team members in Microsoft Azure AD multi-factor authentication.
- B. Add the devices to Microsoft 365 using the Devices tile.

- C. Enroll devices in Microsoft Intune.
- D. Instruct team members to sign in to their devices using their Microsoft Azure AD credentials.

Answer: D

Explanation:

Question: 92

DRAG DROP

A company purchases Microsoft 365 E5.

You need to determine which security features you should implement.

Which features should you implement? To answer, drag the appropriate features to the correct scenarios. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer Area

Features

Microsoft Office 365 Secure Score

Customer Lockbox

Microsoft Office 365 Advanced Threat Protection

Data Loss Prevention

Scenario

Provide recommendations to reduce risk.

Control how a Microsoft support engineer accesses data during a help session.

Protect against unknown malware viruses, and malicious URLs.

Identify sensitive data and create policies that help prevent users from accidentally or intentionally sharing the data.

Question: 96

HOTSPOT

A company plans to deploy Microsoft Intune.

Which types of apps can be managed by Intune?

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Intune supports management of apps from third-party stores	☐	☐
Intune supports volume licensing of iOS and Android store apps.	☐	☐
Intune supports the management of line-of-business and public-facing apps	☐	☐

Answer:

Explanation:

Statement	Yes	No
Intune supports management of apps from third-party stores.	☐	☐
Intune supports volume licensing of iOS and Android store apps.	☐	☐
Intune supports the management of line-of-business and public-facing apps	☐	☐

Question: 97

You are the Microsoft 365 administrator for a company.

You install Microsoft Office 365 ProPlus on five devices. You deactivate the Microsoft Office 365 ProPlus license on one device.

Which task can you perform on that device?

- A. Start a new document from a template
- B. Create a document
- C. Co-author a document
- D. View a document

Answer: D

Explanation:

When you deactivate a Microsoft Office 365 ProPlus license, Office 365 ProPlus remains installed on the computer, but you can only view and print documents. All features for editing or creating new documents are disabled.

Note:

There are several versions of this question in the exam. The question has two possible correct answers:

View a document

Print a document

Other incorrect answer options you may see on the exam include the following:

Leave a comment in a document.

Start a new document from a template.

Set properties on a document.

Create a document

Edit a document

Co-author a document

Edit a column

Question: 99

HOTSPOT

A company plans to transition from supporting servers on-premises to using Microsoft 365 services.

You need to determine which Microsoft 365 workload is appropriate to replace each on-premises service.

Which workloads should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

On-premises service

Get updates on the latest news and announcements from an intranet site hosted on an internal web server.

View videos hosted on an internal web server.

Store and retrieve shared documents on a local file server.

Store documents in a personalized folder on a local file server.

Chat with other employees by using an on-premises Skype for Business server.

Microsoft 365 workload

	▼
SharePoint Online

Question: 100

Your company has a Microsoft Office 365 subscription.

You need to co-author files with other users.

Which tool should you use?

- A. Microsoft SharePoint Online
- B. Microsoft Skype for Business Online
- C. Microsoft Office Delve
- D. Microsoft Exchange Online

Answer: A

Explanation:

Question: 101

You are the Microsoft Office 365 administrator for a company.

You need to perform security and compliance reviews before new updates are distributed to the entire company.

What should you implement?

- A. standard releases
- B. Microsoft 365 Enterprise Test Lab
- C. targeted releases
- D. FastTrack

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/admin/manage/release-options-in-office-365?view=o365-worldwide>

Question: 102

Your company purchases Microsoft 365 Enterprise and Azure AD P2 licenses.

You need to provide identity protection against malicious login attempts.

What should you implement?

- A. Azure AD Identity Protection
- B. Azure AD Privileged Identity Management
- C. Azure Information Protection
- D. Azure Identity and Access Management

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/overview>

Question: 103

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
A sensitivity level can be used to prevent data loss from Windows Q Q devices by turning on the endpoint protection in Microsoft Intune	☐	☐
You can use a sensitivity label to mark the content of documents by Q O adding a custom watermark.	☐	☐
After a sensitivity level is applied, the content of documents is Q Q encrypted, but the content of email is not encrypted.	☐	☐

Answer:

Explanation:

Statement	Yes	No
A sensitivity level can be used to prevent data loss from Windows Q Q devices by turning on the endpoint protection in Microsoft Intune.	☐	☐
You can use a sensitivity label to mark the content of documents by Q Q adding a custom watermark	☐	☐
After a sensitivity level is applied, the content of documents is Q encrypted, but the content of email is not encrypted	☐	☐

Question: 104

This question requires that you evaluate the Bold text to determine if it is correct.

A company needs to protect documents and emails by automatically applying classifications and **labels**. You must minimize costs.

You should implement **Information Rights Management**.

Review the underlined text. If it makes the statement correct, select No change is needed. If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change needed.
- B. Azure Information Protection Premium P2
- C. Azure Information Protection Premium P1
- D. Microsoft 365 E3

Answer: B

Explanation:

Reference:

<https://azure.microsoft.com/en-us/pricing/details/information-protection/>

Question: 105

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Licensing through a Cloud Solution Provider (CSP) allows you to purchase nonperpetual software for on-premises use.

Yes

No

Licensing through a Cloud Solution Provider (CSP) allows you to receive a discount based on volume

0

0

Licensing through a Cloud Solution Provider (CSP) allows you to receive technical support on your Microsoft services from a certified partner.

0

0

Answer:

0

0

Explanation:

Question: 106

A company plans to purchase Microsoft 365.

You need to give management an overview of the Microsoft 365 pricing model.

Which of the following describes how the company will be billed for Microsoft 365?

Yes

No

Licensing through a Cloud Solution Provider (CSP) allows you to purchase nonperpetual software for on-premises use.

☐

☐

Licensing through a Cloud Solution Provider (CSP) allows you to receive a discount based on volume.

☒

☐

Licensing through a Cloud Solution Provider (CSP) allows you to receive technical support on your Microsoft services from a certified partner.

☐

☐

A. The company will be charged according to the amount of computing resources it uses each month across all users.

B. The company will make a single payment for Microsoft 365, after which it owns the license for Microsoft 365 and can use it in an unlimited fashion.

C. The company will be charged annually for a single Microsoft 365 license that can be shared among all employees.

D. The company will be charged according to the number of user licenses required.

Answer: D

Explanation:

<https://www.microsoft.com/en-ww/microsoft-365/business/compare-all-microsoft-365-business-products?market=af>

Question: 107

You are the Microsoft 365 administrator for a company.

You need to track scheduled maintenance events in Microsoft 365 admin center.

Where can you track these events?

- A. Reports
- B. Support
- C. Service Health
- D. Message Center

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-health-and-continuity>

Question: 108

You are the Office 365 administrator for a company.

You encounter a problem in your tenant. You launch the Microsoft 365 admin center and select **Create a new service request**.

You need to get help resolving your problem through the admin center.

Which three actions can you perform from the admin center? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Receive a Microsoft technical support phone number to speak with a Microsoft support technician.
- B. Request a Microsoft service technician to contact you by using email.
- C. Use the query text box to type information about your problem and receive links to help documentation.
- D. Schedule a time for a Microsoft service technician to call you.
- E. Chat with a live Microsoft service engineer.

Answer: B,C,D

Explanation:

Beside the query text box you have 3 preferred contact options with a MS engineer:

1) Phone (Response within 15 min) 2) Email (Response within 1 hour) 3) Schedule a call back

Question: 109

You are the Microsoft 365 administrator for a company.

You install Microsoft Office 365 ProPlus on five devices. You deactivate device.

Which task can you perform on the deactivated device?

- A. Print a document.
- B. Leave a comment in a document.
- C. Start a new document from a template.
- D. Set properties on a document.
- E. Create a document
- F. Edit a document
- G. Co-author a document

Answer: A

Explanation:

Reference:

https://blogs.technet.microsoft.com/office_resource_kit/2014/01/17/office-365-proplus-multiple-devices-and-deactivation/

When you deactivate a Microsoft Office 365 ProPlus license, Office 365 ProPlus remains installed on the computer, but you can only view and print documents. All features for editing or creating new documents are disabled.

Note:

There are several versions of this question in the exam. The question has two possible correct answers:

View a document

Print a document

Other incorrect answer options you may see on the exam include the following:

Leave a comment in a document.

Start a new document from a template.

Set properties on a document.

Create a document

Edit a document

Co-author a document

Edit a column

Reference:

https://blogs.technet.microsoft.com/office_resource_kit/2014/01/17/office-365-proplus-multiple-devices-and-deactivation/

Question: 110

HOTSPOT

You are a Microsoft 365 administrator for a company. The company implements federated authentication and Azure AD Connect.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes

No

Users have the same passwords in the cloud and on-premises.

☐☐

Users sign in again to access Microsoft 365.

☐☐

You can configure federated authentication to require a smart card.

☐☐

Answer:

Explanation:

Statement	Yes	No
Users have the same passwords in the cloud and on-premises.	☒	☐
Users sign in again to access Microsoft 365.	☐	☒
You can configure federated authentication to require a smart card.	☒	☐

Reference:

<https://docs.microsoft.com/en-us/azure/security/fundamentals/choose-ad-authn>

Question: 111

A company deploys Microsoft Azure AD. You enable multi-factor authentication.

You need to inform users about the multi-factor authentication methods that they can use.

Which of the following methods is NOT a valid multi-factor authentication method in Microsoft 365?

- A. Receive an automated call on the desk phone that includes a verification code.
- B. Use the Microsoft Authenticator mobile application to receive a notification and authenticate.
- C. Receive a call on a phone.
- D. Enter a Windows 10 PIN code when prompted.

Answer: D

Explanation:

<https://www.microsoft.com/en-us/microsoft-365/blog/2014/02/10/multi-factor-authentication-for-office-365/>

Question: 112

A company has a Microsoft 365 subscription and a Microsoft Azure support plan.

You need to implement only Azure services for which Microsoft provides technical support.

Which two types of services and features can you implement? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. general availability
- B. targeted release
- C. public preview
- D. private preview

Answer: A,C

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/admin/manage/release-options-in-office-365?view=o365-worldwide>

Question: 113

DRAG DROP

A company plans to migrate to a hybrid cloud infrastructure.

You need to determine where to manage the different features after the hybrid deployment is complete.

Match each item to the location where it will be managed. To answer, drag the appropriate item from the column on the left to its location on the right. Each item may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Configuration locations

Microsoft 365 only
on-premises only
both Microsoft 365 and on-premises

Option

Configure multi-factor authentication for cloud services.

Configure email disclaimers.

Configure compliance.

Set frequency of Microsoft Office 365 updates.

Configuration location

Configuration location

Configuration location

Answer:

Explanation:

Option

Configure multi-factor authentication for cloud services.

both Microsoft 365 and on-premises

Configure email disclaimers.

both Microsoft 365 and on-premises

Configure compliance.

Microsoft 365 only

Set frequency of Microsoft Office 365 updates.

on-premises only

Question: 114

You manage a local Active Directory Domain Services environment. Your company purchases an Enterprise E1 license for all users.

You need to implement self-service password reset. You want to achieve this goal while minimizing costs.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Upgrade your subscription to Azure AD Premium P2.
- B. Deploy Azure AD Connect.
- C. Deploy Azure Information Protection.
- D. Upgrade your subscription to Azure AD Premium P1.

Answer: B,D

Explanation:

Question: 115

You are a Microsoft 365 administrator for a company.

What are two ways that you can ensure data security? Each correct answer presents a complete solution.

NOTE:Each correct selection is worth one point.

- A. service-level encryption using customer-provided key
- B. tenant-dedicated Microsoft Azure AD encryption using customer-provided key
- C. single-tenant infrastructure partitions for sensitive data
- D. data transfer using transport-layer security (TLS)

Answer: A,D

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/customer-key-set-up?view=o365-worldwide#:~:text=With%20Customer%20Key%2C%20you%20control,to%20them%2C%20with%20their%20keys>

Question: 116

You are a Microsoft 365 administrator for a company.

You need to identify security vulnerabilities by using the Office 365 Attack Simulator.

Which three attacksimulations are available? Each correct answer presents a complete solution.

NOTE:Each correct selection is worth one point.

- A. Brute-force password
- B. Cross-site scripting
- C. Password-spray
- D. Denial-of-service
- E. Display name spear-phishing

Answer: A,C,E

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/attack-simulator>

Question: 117

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
It is possible to connect cloud services to on-premises server resources.	☐	☐
Scaling cloud-hosted infrastructure components includes expanding server resources and networking components.	☐	☐

Answer:

Explanation:

Statement	yes	No
It is possible to connect cloud services to on-premises server resources.	☐	☐

Scaling cloud-hosted infrastructure components includes Q Q expanding server resources and networking components.

Question: 118

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Adopting cloud applications reduces the number of on-premises Q servers and services to manage.	☐	☐
For remote users, accessing applications stored in the cloud is easier than accessing applications stored on a company network.	☐	☐
A loss of internet connectivity will not significantly impact functionality for users accessing applications and services in the cloud.	☐	☐

Answer:

Explanation:

Statement	Yes	No
Adopting cloud applications reduces the number of on-premises servers and services to manage	☐	☐
For remote users, accessing applications stored in the cloud is easier than accessing applications stored on a company network	☐	☐
A loss of internet connectivity will not significantly impact functionality for users accessing applications and services in the cloud	☐	☐

Question: 119

DRAG DROP

QUESTION NO: 120

DRAG DROP

You are the Microsoft 365 administrator for a company that uses only on-premises resources. The company does not have a private cloud.

You need to deploy cloud-based resources for the company that minimizes costs.

Which cloud models should you use? To answer, drag the appropriate cloud models to the correct requirements. Each cloud model may be used one, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Cloud models

Private

Public

Hybrid

Requirement

Provide an on-demand sandbox environment.

Provide failover capabilities between local resources that you manage and resources in other regions

Deploy virtual machines that use proprietary peripheral devices.

Cloud model

Answer:

Explanation:

Requirement

Cloud model

Provide an on-demand sandbox environment.

Public

Provide failover capabilities between local resources that you manage and resources in other regions.

Hybrid

Deploy virtual machines that use proprietary peripheral devices.

Private

Question: 120

Your company is evaluating the differences between deployments of Office 365 ProPlus and Office 2016.

You need to determine the installation features of each deployment.

Which installation feature is unique to Office 365 ProPlus?

- A. Installation can be completed by using Click-to-Run.
- B. Installation can be completed by using System Center Configuration Manager.
- C. Installation is available in both 32-bit and 64-bit versions.
- D. Installation is on the user's local computer.

Answer: A

Explanation:

<http://blog.accessitautomation.com/office-2019-msi>

Question: 121

A company has a Microsoft 365 subscription that includes Office apps.

A user has identified a new issue while working with an app. When the user attempts to create a support request, the following message displays:

You don't have permission to access this page or perform this action.

You need to determine the cause of the error message.

What is the cause?

- A. The user account is disabled.
- B. The user does not have a license assigned for the app.
- C. The user account is not a member of the global admin role.
- D. The company does not have Premier support.

Answer: C

Explanation:

Question: 122

This question requires that you evaluate the underlined BOLD text to determine if it is correct.

Microsoft 365 is a Platform as a service (PaaS).

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. Infrastructure as a service (IaaS)
- B. Windows as a service (WaaS)
- C. Software as a service (SaaS)
- D. No change is needed

Answer: C

Explanation:

Microsoft 365 is SaaS, which provides an online version of MS Office Suite (Office Web Apps) along with SharePoint Server, Exchange Server and Lync Server.

Reference:

<https://www.cswire.com/cms/information-management/cloud-service-models-iaas-saas-paas-how-microsoft-office-365-azure-fit-in-021672.php>

Question: 123

You are a Microsoft 365 administrator for a company. You use products that are in private preview, public preview, or general availability (GA).

You need to determine at which phases you can receive support from the Microsoft 365 admin center.

For which product phase or phases can you receive support?

- A. GA, private preview, and public preview
- B. GA and private preview only
- C. GA only
- D. GA and public preview only
- E. public preview and private preview only

Answer: C

Explanation:

Reference:

<https://www.rmsource.com/blogsite/Pages/Microsoft-Azure---Public-Preview-Release-Status.aspx>

Question: 124

You need to ensure that the process by which users sign in to Microsoft 365 confirms the identity of the user.

Which feature should you use?

- A. mobile application management (MAM)
- B. Advanced Threat Protection (ATP)
- C. Multi-Factor Authentication (MFA)
- D. data loss prevention (DLP) policies

Answer: C

Explanation:

Multi-Factor Authentication (MFA) is a two-step identity verification system that can be used to authenticate users.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-mfa-howitworks>

Question: 125

You are a Microsoft 365 administrator for a company.

You need to ensure that company documents are marked as confidential. You must prevent employees from sharing

documents with people outside the company.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Validate outbound emails by using DomainKeys identified Mail (DKIM)
- B. Create sensitive information types
- C. Configure Secure/Multipurpose Internet Mail Extensions (S/MIME) settings for Outlook
- D. Create data-loss prevention policy
- E. Apply sensitivity labels to documents

Answer: B,E

Explanation:

B. Sensitive information types can also be used with the Azure Information Protection scanner to classify and protect files on premises. Sensitive information types define how the automated process recognizes specific information types such as health service numbers and credit card numbers.

E. With sensitivity labels you can classify and help protect your sensitive content. Protection options include labels, watermarks, and encryption.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/protect-information>

Question: 126

HOTSPOT

: 127

HOTSPOT

You manage point-of-sale terminals that run Windows 7.

You must upgrade the terminals to Windows 10. Terminals must not be upgraded again for at least five years. You have the following requirements:

Perform consistent scheduling of upgrades and updates across all devices.

Minimize costs.

You need to prepare for the upgrades.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Option	Value
Windows 10 version	Windows 10 Pro Windows 10 Home Windows 10 Enterprise Windows 10 Enterprise LTSC
Servicing channel	Semi-annual channel Long-term servicing channel Semi-annual channel (targeted) Insider
Servicing tool	Microsoft Intune Windows Autopilot Windows Server Update Services System Center Configuration Manager

Answer:

Explanation:

Question: 127

DRAG DROP

: 128

DRAG DROP

Match each scenario to its platform or platforms.

Instructions: To answer, drag the appropriate scenario from the column on the left to its platform or platforms on the right. Each scenario may be used only once.

NOTE: Each correct match is worth one point.

Answer Area

Scenarios	Platform	Scenario
Provide physical access to the hardware	On-premises only	
Do not require patching of operating systems cloud only		
Monitor usage of the file storage.	Both cloud and on-premises	

Answer:

Explanation:

Platform

Scenario

On-premises only	Provide physical access to the hardware
Cloud only	Do not require patching of operating systems
Both cloud and on-premises	Monitor usage of the file storage

Question: 128

HOTSPOT

: 129

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes No

- You can secure web apps that are published through Azure AD Application Proxy by using Multi-Factor Authentication (MFA) in the cloud.
- You can secure web apps that are published through Azure AD Application , ,

Proxy by using MFA Server on-premises

Answer:

Explanation:

Statement

Yes No

You can secure web apps that are published through Azure AD Application Proxy by using Multi-Factor Authentication (MFA) in the cloud.

You can secure web apps that are published through Azure AD Application , Proxy by using MFA Server on-premises.

You can use Conditional Access to configure Multi-Factor Authentication policies. Conditional Access runs on Azure AD

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy-security>

<https://thesleepyadmins.com/2019/02/10/configure-mfa-for-azure-application-proxy/>

Question: 129
: 130

You need to ensure that all users in your tenant have access to the earliest release of updates in Microsoft 365. You set the organizational release preference to Standard release.

Select the correct answer if the underlined text does not make the statement correct. Select “No change is needed” if the underlined text makes the statement correct.

- A. Targeted release for entire organization
- B. No change is needed
- C. Targeted release for select users
- D. First release

Answer: A

Explanation:

Standard release is the default setting. It implements updates on final release rather than early release.

First release is now called Targeted release. Targeted release is the early release of updates for early feedback. You can choose to

have individuals or the entire organization receive updates early.

<https://docs.microsoft.com/en-us/office365/admin/manage/release-options-in-office-365?view=o365-worldwide>

Question: 130

: 131

You are the desktop administrator for an organization.

You need to ensure that Office 365 ProPlus is installed on all employee computers.

Which three tools can you use to deploy Office 365 ProPlus? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Intune
- B. System Center Operations Manager
- C. Windows Installer (MSI) package
- D. System Center Configuration Manager
- E. Office Deployment Tool

Answer: A,D,E

Explanation:

Microsoft Intune allows you to deploy Office 365 ProPlus applications to Windows 10 devices from the cloud.

System Center Configuration Manager allows you to deploy Office 365 ProPlus to client computers from a local source, using your Configuration Manager distribution points.

The Office Deployment Tool (ODT) allows you to deploy Office 365 ProPlus to client computers from the Office Content Delivery Network (CDN) or from a shared folder on your network.

Reference:

<https://techcommunity.microsoft.com/t5/enterprise-mobility-security/deploying-office-365-proplus-with-microsoft-intune/ba-p/250292>

<https://docs.microsoft.com/en-us/DeployOffice/deploy-office-365-proplus-from-the-cloud>

<https://docs.microsoft.com/en-us/DeployOffice/deploy-office-365-proplus-from-a-local-source>

Question: 131

: 132

You are the network administrator of a company.

The Microsoft 365 tenant contains sensitive information. Employees must verify their identities when they sign into Microsoft 365 by providing information in addition to their Azure AD password.

You need to select the tools that employees can use to verify their identities.

Which two tools should you select? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Customer Lockbox for Office 365
- B. Microsoft Security Center
- C. Windows Hello for Business
- D. Microsoft Authenticator

Answer: C,D

Explanation:

Two-step authentication can be implemented by using Windows Hello for Business or Microsoft Authenticator.

Reference:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-in-organization>

<https://support.microsoft.com/en-us/help/4026727/microsoft-account-how-to-use-the-microsoft-authenticator-app>

Question: 132

: 133

You need to move videos to a Microsoft 365 tenant and ensure that the contents are automatically transcribed.

Which Microsoft 365 service should you use?

- A. Yammer
- B. Stream
- C. Flow

Answer: B

Explanation:

Microsoft Stream is used for video services, and includes deep search within automatic audio transcription.

Reference:

<https://docs.microsoft.com/en-us/stream/office-365-video-feature-breakdown>

Question: 133

: 134

An organization uses Microsoft 365 Business to secure their data.

Many users install the organization's data on their personal tablets and phones.

You need to protect the organization's data stored on users' devices.

Which three features support device security? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Remotely wiping company data
- B. Enabling Advanced Threat Protection for users
- C. Disabling the device remotely
- D. Automatically deleting files after 90 days of inactivity
- E. Requiring users to have a PIN on their device

Answer: A,D,E

Explanation:

You can manage many of the Microsoft 365 Business security features in the admin center, which gives you a simplified way to turn these features on or off. In the admin center, you can do the following:

Set application management settings for Android or iOS devices.

These settings include deleting files from an inactive device after a set period, encrypting work files, requiring that users set a PIN, and so on.

Set application protection settings for Windows 10 devices.

These settings can be applied to company data on both company-owned, or personally owned devices.

Set device protection settings for Windows 10 devices.

You can enable BitLocker encryption to help protect data in case a device is lost or stolen, and enable Windows Exploit Guard to provide advanced protection against ransomware.

Remove company data from devices.

You can remotely wipe company data if a device is lost, stolen, or an employee leaves your company. Reset Windows 10 devices to their factory settings.

You can reset any Windows 10 devices that have device protection settings applied to them.

Cloud computing enables low-cost infrastructure scaling	☐	☐

Question: 138

: 139

A business acquaintance from another company sends you a document that is encrypted by Azure Information Protection (AIP).

You are unable to open the document because the user account cannot be authenticated by the

company's Azure Active Directory.

You need to access the document.

What should you do?

- A. Implement Azure RightsManagement (RMS) for individuals for the user account.
- B. Implement Information Rights Management (IRM) for the Office application.
- C. Upgrade your account to include AIP for Office 365.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/information-protection/rms-for-individuals>

Question: 139

Which type of cloud model provides access to Microsoft Office apps?

- A. platform as a service (PaaS)
- B. infrastructure as a service (IaaS)
- C. software as a service (SaaS)

Answer: C

Explanation:

Microsoft 365 is SaaS, which provides an online version of MS Office Suite (Office Web Apps) along with SharePoint Server, Exchange Server and Lync Server.

Question: 174

A company plans to deploy a customer relationship management (CRM) solution.

This solution must provide enterprise resource planning (ERP) integration as well as artificial intelligence (AI) tools. You need to choose a solution that meets the requirements. What should you choose?

- A. SharePoint Online
- B. Microsoft 365
- C. Power Platform
- D. Dynamics 365

Answer: D

Explanation:

Question: 175

A company uses Microsoft 365.

You need to assign licenses to users.

Which two portals can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. AzureActive Directory admin center
- B. Microsoft Compliance Manager
- C. Microsoft 365 admin center
- D. Security & Compliance Center

Answer:
A,C

Explanation:

Question: 176

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, selectNo.

NOTE:Each correct selection is worth one point.

Statements	Yes	No
OneDrive for Business provides version control for shared documents	☐	☐
Power Automate provides automated workflows between apps	☐	☐
SharePoint provides shared calendars and shared task lists	☐	☐

Answer:

Explanation:

Statements

Yes

No

OneDrive for Business provides version control for shared documents

Q

☐

Power Automate provides automated workflows between apps

Q

☐

SharePoint provides shared calendars and shared task lists

☐

Question: 177

A company uses Microsoft 365.

Employees frequently work from home. They must be able to access custom applications that are not installed on their personal laptops.

You need to identify a solution that meets the requirement.

Which solution should you choose?

- A. Microsoft Access
- B. Power Virtual Agent
- C. Microsoft Remote Assist
- D. Windows Virtual Desktop
- E. Microsoft Teams

Answer: B

Explanation:

Question: 178

DRAG DROP

You are investigating Microsoft 365 services and capabilities.

Match each scenario to its Microsoft 365 service. To answer, drag the appropriate Microsoft 365 service from the column on the left to its scenario on the right. Each Microsoft 365 service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Microsoft 365 services

Exchange Online

Microsoft Teams

Microsoft Stream

Answer Area

Scenario

Users need to communicate in email, use a calendar, and store contacts.

Users need a central hub for meetings, chat, content, and calling.

Microsoft 365 service

Microsoft 365 service

Microsoft 365 service

Answer:

Explanation:

Scenario

Users need to communicate in email, use a calendar, and store contacts.

Users need a central hub for meetings, chat, content, and calling

Microsoft 365 service

Exchange Online

Microsoft Teams

Question: 179

DRAG DROP

A company that uses Microsoft 365 plans to deploy updates to computers.

You need to choose the appropriate update channel based on each requirement.

Which update channel should you use for each requirement? To answer, drag the appropriate update channels to the correct requirements. Each update channel may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct match is worth one point.

Update channels

Current

Monthly Enterprise

Semi-Annual Enterprise

Answer Area

Requirement

Provides the newest features as soon as they are ready

Provides the newest feature updates on a schedule

Provides the most amount of time to test feature updates

Update channel

Update channel

Update channel

Update channel

Requirement

Update channel

Provides the newest features as soon as they are ready

Current

Provides the newest feature updates on a schedule

Question: 180

A company uses Microsoft 365.

The company is considering using MyAnalytics.

You need to identify the features of MyAnalytics.

What are two features of MyAnalytics? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. suggestions in Microsoft Outlook to review outstanding tasks
- B. suggestions in Microsoft Teams to delay delivery of chat messages
- C. suggestions in Microsoft Outlook to delay delivery of emails
- D. suggestions in Teams to review outstanding tasks

Answer:

A,C

Explanation:

Question: 181

HOTSPOT

You are evaluating Office 365 ProPlus for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Employees must use a browser to co-author documents, spreadsheets, and presentations.		0
Employees can edit documents, spreadsheets, and presentations by using a browser or the desktop app	0	0
Employees can use mobile devices, tablets, and laptops to edit documents, spreadsheets, and presentations	0	0

Answer:

Explanation:

Statements	Yes	No
Employees must use a browser to co-author documents, spreadsheets, and presentations.	0	
Employees can edit documents, spreadsheets, and presentations by using a browser or the desktop app.		0
Employees can use mobile devices, tablets, and laptops to edit documents, spreadsheets, and presentations	(2)	0

Question: 182

A company uses Microsoft 365.

The company wants to create a chat bot for integration with Microsoft Teams.

You need to identify a solution to create the chat bot.

Which solution should you choose?

- A. Remote Assist
- B. Dynamics 365 Customer Service
- C. Power Virtual Agent
- D. Dynamics 365 Guides

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/platform/bots/what-are-bots>

Question: 183

DRAG DROP

A company is evaluating the licenses that are available in Microsoft 365.

The company needs to minimize licensing costs.

Match each license to its requirement. To answer, drag the appropriate license from the column on the left to its requirement on the right. Each license may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Licenses	Requirement	License
Microsoft 365 Business Premium	Users require a mailbox and will use Office web and mobile apps to access the mailbox.	License
Microsoft 365 E3	Users require a mailbox and will use Outlook and mobile apps to access the mailbox.	License
Microsoft 365 E5	Users require a Windows 10 Enterprise license and a mailbox. They will use Outlook to access the mailbox.	License
Microsoft 365 F3	Users require a Windows 10 Enterprise license, a phone system license, and a mailbox. They will use Outlook to access the mailbox.	License

Answer:

Explanation:

Requirement

License

Users require a mailbox and will use Office web and mobile apps to access the mailbox

Microsoft 365 F3

Users require a mailbox and will use Outlook and mobile apps to access the mailbox

Microsoft 365 Business
Premium

Users require a Windows 10 Enterprise license and a mailbox. They will use Outlook to access the mailbox.

Microsoft 365 E3

Users require a Windows 10 Enterprise license, a phone system license, and a mailbox. They will use Outlook to access the mailbox.

Microsoft 365 E5

IaaS

Question: 185

DRAG DROP

You are planning to deploy Microsoft 365 for a company.

You need to determine which cloud services to use.

Which cloud services should you use? To answer, drag the appropriate cloud services to the correct requirements. Each cloud service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Cloud services

Infrastructure as a service (IaaS)

Software as a service (SaaS)

Windows as a service (WaaS)

Answer Area

Requirement

Use Microsoft Outlook on the web

Test Microsoft Insider Preview Branch versions of Windows software.

Deploy virtual machines quickly.

Cloud service

Cloud service

Cloud service

Cloud service

Answer:

Explanation:

Requirement

Cloud service

Use Microsoft Outlook on the web Software as a service (SaaS)

Test Microsoft Insider Preview Branch
versions of Windows software

Windows as a service (WaaS)

Deploy virtual machines quickly

Infrastructure as a service (IaaS)

Question: 186

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes

Platform as a Service (PaaS) services include Office 365, Microsoft o Intune, and Dynamics 365.

Infrastructure as a Service (IaaS) enables users to build server- 0 based IT workloads in the cloud

Software as a Service (SaaS) consists of IT workloads that run on ☐ customer virtual machines.

Answer:

Explanation:

Statement

Yes No

Platform as a Service (PaaS) services include Office 365, Microsoft o O Intune, and Dynamics 365.

Infrastructure as a Service (IaaS) enables users to build server- 0 O based IT workloads in the cloud

Software as a Service (SaaS) consists of IT workloads that run on O customer virtual machines.

Question: 187

HOTSPOT

A company uses Microsoft 365.

The company requires the sales team to record all live demonstrations for training purposes.

You need to select the Microsoft tool that the sales team should use for each requirement.

Which tool should you select for each requirement? To answer, select the appropriate tools in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Tool

Host and record a live event for customers to discuss new product offerings.

▼
Dynamics 365 Sales
Microsoft Teams
Microsoft Sway

Store recorded presentations and create searchable closed captions and speech-to-text information for the files

Microsoft Stream
Microsoft Sway
Power Automate
Microsoft OneDrive

Answer:

Explanation:

Requirement

Tool

Host and record a live event for customers to discuss new product offerings.

▼
Dynamics 365 Sales

Question: 188

DRAG DROP

A company plan to deploy Microsoft 365 services.

You need to choose the appropriate cloud service for each requirement.

Which cloud service should you choose for each requirement? To answer, drag the appropriate cloud services to the correct requirements. Each cloud service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct match is worth one point.

Cloud services

Answer Area

Exchange Online

Requirement

Cloud service

Microsoft Teams

Users must be able to chat, host meetings, and make calls with internal and external users

Cloud service

Yammer

Users must be able to create posts, tag people and communities, and use social tagging

Cloud service

Microsoft Stream

Answer:

Explanation:

Requirement

Cloud service

Users must be able to chat, host meetings, and make calls with internal and external users.

Microsoft Teams

Users must be able to create posts, tag people and communities, and use social tagging.

Yammer

Question: 189

A company uses Microsoft 365.

The company needs information about the collaboration patterns that impact employee productivity. You need to identify the solution that meets the requirement.

Which solution should you choose?

- A. MyAnalytics
- B. Workplace Analytics
- C. Microsoft 365 admin center
- D. Azure Analytics

Answer: B

Explanation:

Reference:

<https://www.microsoft.com/en-gb/microsoft-365/business/workplace-analytics>

Question: 190

A company deploys Microsoft 365.

You notice improvements that can be made to some Microsoft 365 services.

You need to submit a formal feature request to Microsoft with your suggestions for improvements.

Which tool should you use?

- A. Microsoft Office Support site
- B. Security & Compliance Center
- C. Microsoft 365 Roadmap site
- D. Feedback Hub app
- E. UserVoice site

Answer: E

Explanation:

Reference:

<https://regarding365.com/microsoft-uservoice-sites-b4793aa6d496>

Question: 191

You need to determine the release date of Microsoft 365 features.

What should you use?

- A. Office Deployment Tool release history

- B. Microsoft 365 admin center
- C. Microsoft System Center
- D. Microsoft 365 Roadmap
- E. Windows Insider program

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/commerce/billing-and-payments/manage-billing-profiles>

Question: 193

A company deploys Microsoft 365.

You must implement conditional access to restrict access to administrative accounts when users authenticate from specific locations.

You need to select the lowest cost license that meets the requirement.

Which license should you choose?

- A. Azure Active Directory Premium P1
- B. Azure Active Directory Premium P2
- C. Azure Active Directory Free
- D. Azure Active Directory B2B

Answer: A

Explanation:

Conditional access policies require an Azure AD Premium P1 license.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview#license-requirements>

Question: 194

DRAG DROP

A company has an Exchange Server instance and plans to start using Microsoft 365 and Azure Services.

You need to choose the appropriate resource based on its scenario.

Which resource should you choose for each scenario? To answer, drag the appropriate resources to the correct scenarios. Each resource may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a drag-and-drop interface with three main sections: Products, Answer Area, and Scenario.

Products:

- Exchange Server
- Microsoft Azure virtual machines

Scenario:

The company owns the hardware and is responsible for provisioning, managing, and maintaining the operating system and the software. Microsoft owns the hardware. The company is responsible for provisioning, managing, and maintaining the operating system and software.

Product:

Two empty boxes for selecting the appropriate product for the scenario.

Answer:

Explanation:

Products

Exchange Server

Microsoft Azure virtual machines

Answer Are*

Scenario

The company owns (he hard ware and is responsible for provisioning, Exchange Server managing, and maintaining the operating system and the software.

Product

Microsoft owns the hardware. The company is responsible for provisioning, Microsoft Azure virtual machines managing, and maintaining the operating system and software.

Question: 195

A company uses Microsoft 365 services. The company is evaluating multi-factor authentication (MFA) methods.

You need to determine which MFA methods are supported in Microsoft 365.

Which three methods are supported? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Authenticate smart phone app
- B. biometric retinal scanner
- C. verification code sent in a text message
- D. custom security question
- E. verification code sent in a phone call

Answer: A,C,E

Explanation:

Question: 196

A company plans to implement an insider risk solution in Microsoft 365.

The company needs to implement a solution that meets the following requirements:

- Uses machine learning to identify email risks.
- Provides workflows to remediate email risks.
- Provides a dashboard to display email risks, actions, and trends.

You need to identify a solution that meets the requirements. Which solution should you select?

- A. Core eDiscovery cases
- B. Sensitivity labels
- C. Communication compliance policies
- D. Advanced eDiscovery cases

Answer: C

Explanation:

Question: 197

A company uses Microsoft 365.

The company wants to improve their compliance score based on Microsoft recommendations.

You need to identify the task that has the largest impact to the compliance score.

Which task should you choose?

- A. Preventative mandatory
- B. Corrective discretionary
- C. Corrective mandatory
- D. Detective discretionary

Answer: A

Explanation:

Question: 198

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

	Yes*	No
You can use sensitivity labels to encrypt emails and documents	☐	☐
You can use sensitivity label* to control read and write access to a Word document as well as permission levels to modify the contents.	☐	☐
Sensitivity labels can apply watermarks within a Word document to indicate that the document is for internal company use only	☐	☐

Answer:

Explanation:

Answer Area

	Yes	No
You can use sensitivity labels to encrypt emails and documents	☒	☐
You can use sensitivity labels to control read and write access to a	☒	☐

Word document as well as permission levels to modify the contents.
Sensitivity labels can apply watermarks within a Word document to indicate that the document is for internal company use only.

O

Question: 199

DRAG DROP

Match each authentication identity to its scenario. To answer, drag the appropriate authentication identity from the column on the left to its scenario on the right. Each authentication identity may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Authentication identities	Scenario	Authentication identity
Azure Active Directory identity only	Used to provide authentication for Microsoft 365 services	
Active Directory identity only	Used to provide authentication for Exchange Server	
Azure Active Directory identity and Active Directory identity		

Answer:

Explanation:

Authentication identities	Scenario	Authentication identity
Azure Active Directory identity only	Used to provide authentication for Microsoft 365 services	Azure Active Directory identity and Active Directory identity
Active Directory identity only	Used to provide authentication for Exchange Server	Azure Active Directory identity only
Azure Active Directory identity and Active Directory identity		

Question: 200

A company uses Microsoft 365.

The company needs to remotely encrypt devices.

You need to identify which solution meets the requirement.

Which solution should you choose?

- A. Retention labels
- B. Microsoft Intune
- C. Azure Information Protection scanner
- D. Sensitivity labels

Answer: B

Explanation:

Question: 201

After experiencing security breaches with on-premises servers, a company is considering migrating to Microsoft 365 for their security solutions. What are three security-related benefits of moving to Microsoft 365? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Microsoft 365 prevents all attackers from gaining access to company data.
- B. Microsoft simplifies infrastructure management to help detect and respond to threats.
- C. Microsoft 365 monitors all customers for threats to prevent attacks.
- D. Microsoft 365 can troubleshoot security issues by accessing customer data without explicit permission from the customer.
- E. Microsoft employs a full-time team of penetration testers to identify vulnerabilities.

Answer: B,C,E

Explanation:

Question: 202

A company uses Microsoft 365.
The company needs to label emails and documents that contain confidential text.
You need to identify a feature that meets this requirement.
Which feature should you choose?

- A. Retention label
- B. Sensitivity label
- C. Microsoft Outlook rule
- D. Customer Key

Answer: B

Explanation:

Question: 203

A company plans to migrate on-premises infrastructure to the cloud.

What are three benefits of migrating to the cloud? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Reduce configuration requirements on desktop computers.
- B. Reduce on-site network latency.
- C. Automate data backup and disaster recovery.
- D. Scale and extend applications.
- E. Eliminate the cost of buying server hardware.

Answer: C,D,E

Explanation:

C: Most cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities. Some providers also offer the ability to store backups in different geographic regions.

D: When demand spikes or the organization needs more powerful compute resources, organizations can alter their resources instantly on demand.

E: There are significant savings in resource, maintenance, and real estate costs, in addition to the ability to optimize workloads so that they cost less to run.

Reference:

<https://azure.microsoft.com/en-us/overview/cloud-migration-benefits-challenges/#overview>

Question: 204

A company uses Microsoft cloud services.

You need to change the update channels for the Microsoft 365 Apps for enterprise by using a Microsoft supported method.

Which two methods can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Windows 10 Update Assistant
- B. Group Policy
- C. Client app

- D. Office Deployment Tool
- E. Readiness Toolkit

Answer: B,D

Explanation:

After deploying Microsoft 365 Apps, you can change the update channel with Group Policy or the Office Deployment Tool (ODT).

Reference:

<https://docs.microsoft.com/en-us/deployoffice/change-update-channels>

Question: 205

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Microsoft 365 applications can access Dynamics 365 data by using existing connectors.

Yes No

Microsoft Teams allows you to access customer information in Dynamics 365.

Power Platform allows you to build custom apps to automate processes in Dynamics 365.

Answer:

Explanation:

Microsoft 365 applications can access Dynamics 365 data by using existing connectors.

Yes No

Microsoft Teams allows you to access customer information in Dynamics 365.

Power Platform allows you to build custom apps to automate processes in Dynamics 365.

Box 1: Yes

The Microsoft Dataverse connector is used to connect to Dynamics 365 data

Box 2: Yes

Microsoft Teams users get license-free access to Dynamics 365 data

Box 3: Yes

The Microsoft Dataverse connector allows you to connect PowerPlatform to Dynamic 365 data

Reference:

<https://docs.microsoft.com/en-us/power-platform/important-changes-coming#dynamics-365-connector-is-deprecated>

<https://docs.microsoft.com/en-us/connectors/commondataserviceforapps/>

<https://www.cigconsultants.com/post/microsoft-teams-users-get-license-free-access-to-dynamics-365-data>

Question: 206

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise,

select No.

NOTE:Each correct selection is worth one point.

Yes

No

Dynamics 365 is an infrastructure as a service (IaaS) solution.

☐☐

A Microsoft 365 subscription includes a free subscription to Dynamics 365.

☐☐

Dynamics 365 has an integrated customer relationship management (CRM) application that uses Microsoft 365 Apps.

☐☐

Answer:

Explanation:

Yes No

Dynamics 365 is an infrastructure as a service (IaaS) solution.

A Microsoft 365 subscription includes a free subscription to Dynamics 365.

Dynamics 365 has an integrated customer relationship management (CRM) application that uses Microsoft 365 Apps.

Box 1: No

Dynamics 365 is SaaS

Box 2: No

Dynamics 365 is not part of Microsoft 365

Box 3: No

A connector can be used to connect to Dynamics 365 data but Dynamics 365 does not have Microsoft 365 apps.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/get-started/developers>

Question: 207

DRAG DROP

Acompany plans to use Microsoft 365 Defender.

Which services should you use? To answer, drag the appropriate services to the correct requirements. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE:Each correct selection is worth one point.

Answer Area

Services	Requirement	Service
Microsoft Cloud App Security	Protect against malicious links in email	
Microsoft Defender for Endpoint	Identify unprotected Windows servers	
Microsoft Defender for Office 365		

Answer:

Explanation:

Requirement

Service

Protect against malicious links in email.

Microsoft Defender for Office 365

Identify unprotected Windows servers.

Microsoft Defender for Endpoint

Question: 209

DRAG DROP

A company is evaluating Microsoft cloud service offerings.

Match each offering to the cloud service.

Instructions: To answer, drag the appropriate offering from the column on the left to the cloud service on the right.

Each offering might be used once, more than once, or notat all.

NOTE:Each correct selection is worth one point.

Offerings

Answer Area

Offering

Explanation:

Answer:

Cloud service

Infrastructure as a service (IaaS)

Platform as a service (PaaS)

Software as a service (SaaS)

Offering

Services page

Booking page

Booking calendar

Question: 210

A company uses Microsoft 365.

The company wants to automate an approval process for invoices by using Microsoft Teams.

You need to identify the solution to create the workflow.

Which three solutions can achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power Automate
- B. Power Virtual Agents
- C. Power BI
- D. Microsoft Forms

E. Power Apps

Answer: A,B,E

Explanation:

Reference:

Question: 211

A company uses Microsoft 365 Analytics.

The company wants employees to complete top priority work by:

Scheduling up to two hours every day to spend on top priority work.
Silencing chats in Microsoft Teams during this time.

Which feature should you use?

- A. Focus plans
- B. Work patterns
- C. Digests
- D. Habitplaybooks
- E. Insights add-ins

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/viva/insights/personal/use/focus>

Question: 212

A company uses Microsoft 365.

The company wants to create a workflow that integrates with Microsoft Teams.

What should you use to create the workflow?

- A. Dynamics 365 Customer Service
- B. Power BI
- C. Power Automate
- D. SharePoint Online
- E. Dynamics 365 Commerce

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-automate/flows-teams>

Question: 213

DRAG DROP

A company is evaluating the differences between Microsoft Exchange on-premises and Exchange online.

You need to select the appropriate product for each requirement.

Which product should you select? To answer, drag the appropriate products to the correct requirements. Each product may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Products

Answer Area

Exchange online

Exchange on-premises

Requirement

The company needs to directly apply security updates to the Exchange server application.

The company needs to use Microsoft 365 groups to send and receive email.

The company needs to use Microsoft Bookings.

Question: 215

HOTSPOT

A company uses Microsoft 365 services that include Microsoft eDiscovery.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

Microsoft eDiscovery can be used to identify email content needed as evidence in a legal case

☐☐

Microsoft eDiscovery can be used to search for specific documents that are stored in SharePoint Online

☐☐

Microsoft eDiscovery can be used to ensure that documents in SharePoint sites are retained for seven years and then deleted

☐☐

Answer:

Explanation:

Statements

Yes No

Microsoft eDiscovery can be used to identify email content needed as evidence in a legal case

☒☐

Microsoft eDiscovery can be used to search for specific documents that are stored in SharePoint Online

☐☒

Microsoft eDiscovery can be used to ensure that documents in SharePoint sites are retained for seven years and then deleted

☐☒

Question: 216

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

The Microsoft Authenticator app allows users to sign in to any platform or browser by receiving a phone notification

Windows Hello provides users with biometric authentication based on facial recognition or fingerprint matching

Fast Identity Online (FIDO) allows users to sign in without a username or password by using OAuth hardware tokens

Answer:

Explanation:

Answer Area

Statements

Yes

No

The Microsoft Authenticator app allows users to sign in to any platform or browser by receiving a phone notification

Windows Hello provides users with biometric authentication based on facial recognition or fingerprint matching

Fast Identity Online (FIDO) allows users to sign in without a username or password by using OAuth hardware tokens.

Question: 217

A company plans to deploy a solution to manage its Windows 10 computers. Some computers are connected to the corporate network and some computers are connected to the internet. The solution must meet the following requirements:

Deploy an operating system to the computers.

Join the computer to an on-premises Active Directory domain.

Install Windows updates to the computers.

You need to identify a solution that meets the requirements.

Which solution should you choose?

- A. Microsoft Endpoint Manager
- B. Microsoft Intune
- C. Windows Autopilot
- D. Configuration Manager

Answer: A

Explanation:

Endpoint Manager includes the services and tools you use to manage and monitor mobile devices, desktop computers, virtual machines, embedded devices, and servers. Endpoint Manager combines services, including Microsoft Intune, Configuration Manager, Desktop Analytics, co-management, and Windows

Autopilot.

Reference:

<https://docs.microsoft.com/en-us/mem/endpoint-manager-overview>

Question: 218

A company deploys Microsoft 365.

The company plans to use sensitivity labels.

You need to identify the capabilities of sensitivity labels.

What are three capabilities of sensitivity labels? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Sensitivity labels can be customized.
- B. Sensitivity labels can ensure that a document is retained indefinitely.
- C. Sensitivity labels can trigger disposition reviews.
- D. Sensitivity labels can be used to encrypt documents.
- E. Sensitivity labels can automatically be applied to documents.

Answer: A,D,E

Explanation:

With sensitivity labels you can classify and help protect your sensitive content. Protection options include labels, watermarks, and encryption.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/sensitivity-labels?view=o365-worldwide>

Question: 219

What are three capabilities of Security and Compliance Center? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Management of e-discovery cases, holds, and exports
- B. Assessment and auditing of Active Directory event logs
- C. Prevention of data loss for Exchange Online and SharePoint Online
- D. Assessment and auditing of on-premises firewall logs
- E. Threat management by using email filtering and anti-malware software

Answer: A,C,E

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/office-365-securitycompliance-center>

Question: 220

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

Microsoft Cloud App Security can integrate with multiple clouds

☐☐

Microsoft Cloud App Security can be used to assess the regulatory compliance of cloud apps

☐☐

Microsoft Cloud App Security can provide behavioral analytics and anomaly detection

☐☐

Explanation:

Answer:

Yes

No

Statements

Microsoft Cloud App Security can integrate with multiple clouds

☒☐

Microsoft Cloud App Security can be used to assess the regulatory compliance of cloud apps

☐☒

Microsoft Cloud App Security can provide behavioral analytics and anomaly detection

☒☐

Question: 221

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes

No

Sensitivity labels can be applied automatically and can also prompt users to apply a recommended label.

☐☐

Sensitivity labels can be used to restrict the sharing of information on SharePoint sites to external users.

☐☐

Sensitivity labels can be used to manage conditional access policies for unmanaged devices.

☐☐

Answer:

Explanation:

Statements

Yes

No

Sensitivity labels can be applied automatically and can also prompt users to apply a recommended label.

☒☐

Sensitivity labels can be used to restrict the sharing of information on SharePoint sites to external users.

☐☒

Sensitivity labels can be used to manage conditional access policies for unmanaged devices.

☒☐

Question: 223

DRAG DROP

A company is investigating cloud solution provider (CSP) pricing models for Microsoft cloud services.

Match each CSP pricing model to its definition.

Instructions: To answer, drag the appropriate CSP pricing model from the column on the left to the definition on the right. Each CSP pricing model might be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

CSP pricing models

Answer Area

Direct bill
Indirect reseller
Enterprise agreement
Microsoft Open

Definition

Partners purchase Microsoft products and subscriptions from Microsoft and sell them through their in-house sales staff

Providers purchase Microsoft products and subscriptions from Microsoft and sell them to customers through other third parties

CSP pricing model

Answer:

Explanation:

Definition

CSP pricing model

Partners purchase Microsoft products and subscriptions from Microsoft and sell them through their in-house sales staff

Direct bill

Providers purchase Microsoft products and subscriptions from Microsoft and sell them to customers through other third parties

Indirect reseller

Question: 227

A company plans to deploy a collaboration solution that allows users inside and outside the company access to the same documents, tasks, and conversations.

You need to identify which product meets the requirement.

Which product should you select?

- A. Outlook 365
- B. Microsoft Teams
- C. Microsoft OneDrive
- D. Exchange Online

Answer: B

Explanation:

Question: 228

HOTSPOT

You add a comment to a Word document that includes the @ sign and a user's name.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes

No

The email notification that the user receives displays a preview of the document text and the associated comment.

☐☐

When the user clicks the link in the email, the document opens to the comment in the file.

☐☐

The user can respond to the comment in the document directly from the email.

☐☐

Answer:

Explanation:

Statements

Yes

No

The email notification that the user receives displays a preview of the document text and the associated comment.

☒☐

When the user clicks the link in the email, the document opens to the comment in the file.

☒☐

The user can respond to the comment in the document directly from the email.

Question: 231

DRAG DROP

A company plans to use the reports that are available in Microsoft 365 usage analytics.

Match each report to its description. To answer, drag the appropriate report from the column on the left to its description the right. Each term may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Reports

Communication

Collaboration

Mobility

Storage

Usage

Answer Area

Description

Provides the number of active users and the primary activities of each product for the last 12 months

Identifies patterns in the use of Microsoft Teams and Yammer among users

Identifies the number of documents that are shared internally or externally

Report

Explanation:

Answer:

Description

Provides the number of active users and the primary activities of each product for the last 12 months

Identifies patterns in the use of Microsoft Teams and Yammer among users

Identifies the number of documents that are shared internally or externally

Report

Usage

Communication

Collaboration

Usage – Offers a drill-down view into the volume of active users and the key activities for each product for the last 12 months. Use the reports in this section to learn how people in your organization are using Microsoft 365.

Communication – You can see at a glance whether people in your organization prefer to stay in touch by using Teams, Yammer, email, or Skype calls. You can observe if there are shifts in patterns in the use of communication tools among your employees.

Collaboration – See how people in your organization use OneDrive and SharePoint to store

documents and collaborate with each other, and how these trends evolve month over month. You can also see how many users shared documents internally or externally and how many users used SharePoint sites or OneDrive accounts, broken out by owners and other collaborators.

Storage – Use this report to track cloud storage for mailboxes, OneDrive, and SharePoint sites.

Mobility – Track which clients and devices people use to connect to email, Teams, Skype, or Yammer.

Question: 243

HOTSPOT

Instructions: For each of the following statement, select Yes if the statement is true. Otherwise, Select No.

Conditional access policies allow you to require multi-factor authentication for Microsoft Azure management tasks.

Conditional access policies allow you to require multi factor authentication for users who have administrative roles Configuration of app specific settings require devices to be managed by an organization

Answer:

Explanation:

Answer Area Statements

Yes

No

Conditional access policies allow you to require multi-factor authentication for Microsoft Azure management tasks. Conditional access policies allow you to require multi factor authentication for users who have administrative roles Configuration of app specific settings require devices to be managed by an organization

Question: 244

A company is planning to implement Microsoft 365.

The company has not purchased licenses from Microsoft.

You need to recommend a licensing solution.

Which licensing solution should you recommend?

- A. Add-on user subscription licenses
- B. From Software Assurance (SA) user subscription licenses
- C. Full user subscription licenses
- D. Step-up user subscription licenses

Answer: D

Explanation:

Question: 245

A company is evaluating Microsoft 365.

The company needs an add-on licensing solution that will protect against privacy risks.

You need to determine a solution.

Which solution should you use?

- A. Safe Attachments
- B. Microsoft Purview
- C. Microsoft Priva
- D. Azure Monitor

Answer: C

Explanation:

Question: 246

A company is evaluating Microsoft 365 services.

You need to determine which payment options are supported with a multiple profile. Which three options are supported?

Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. debit card
- B. credit card
- C. money order
- D. cash
- E. check

Answer: A,B,C

Explanation:

Question: 247

Statements	Yes	No
A cloud provider can provide maintenance and security protection for server hardware.	☐	☐
A cloud storage provider can include built-in redundancy and automatic logging.	☐	☐
A cloud provider can manage on-premises resource hardware.	☐	☐

Question: 248

DRAG DROP

A company plans to adopt Microsoft cloud solutions.

You need to identify which platform is appropriate for each solution component.

Which platform should you select? To answer, drag the appropriate platforms to the correct solution components. Each platform may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Platform*	Answer Area	Solution component	Platform
Dynamics 365		Microsoft-developed customer relationship management	Platform
Microsoft Azure	(CRM) application	Windows virtual machine	Platform
		Microsoft-developed enterprise resource planning (ERP) application	Platform

Answer:

Explanation:

Answer Area

Solution component	Platform
Microsoft-developed customer relationship management (CRM) application	Dynamics 365
Windows virtual machine	Microsoft Azure
Microsoft-developed enterprise resource planning (ERP) application	Dynamics 365

Question: 249

A company uses Microsoft 365 to track progress and issues for construction projects.

Project tasks must be tracked within a Microsoft-maintained unified interface that can be shared and updated across multiple users.

You need to recommend a solution for the company.

What should you recommend?

- A. Microsoft To Do
- B. Microsoft Outlook
- C. Microsoft Stream
- D. Microsoft Planner

Answer: D

Explanation:

Question: 250

A company is developing their Windows as a service (WaaS) strategy.

The company needs to preview features from Microsoft in the development cycle as soon as possible.

You need to select the correct solution.

Which solution should you use?

- A. Servicing channels
- B. Flighting
- C. Deployment rings
- D. Proof of concept

Answer: B

Explanation:

Question: 251

HOTSPOT

A company is creating their Windows as a service (WaaS) strategy. You need to determine which type of release should be used. Select the answer that correctly completes the sentence.

Answer Area

The company will validate quality updates in an early release prior to a combined security release through I

B releases Non-security releases C releases
Out-of-band (OOB) releases

Answer:

Explanation:

Answer Area

The company will validate quality updates in an early release prior to a combined security release through Out-of-band (OOB) release

Question: 252

HOTSPOT

A company uses Microsoft 365. The company has an application that runs on a device that does not have internet access. The device can only be updated manually every two years. You need to determine how you should update the device. Select the answer that correctly completes the sentence.

Answer Area

Deploy and update Windows as a service (WaaS) to this device by using

General Availability Channel Long-Term Servicing
Channel Windows Insider Program Microsoft
Intune

Answer:

Explanation:

Answer Arce

Deploy and update Windows as a service (WaaS) to this device by using Microsoft Intune

Question: 253

HOTSPOT

A company is evaluating Microsoft 365.

Select the answer that correctly completes the sentence.

To provide a web page where external customers can schedule an online appointment with staff, you should implement

Microsoft Teams
Microsoft Planner
Microsoft To Do

Answer:

Explanation:

Answer Area

To provide a web page where external customers can schedule an online appointment with staff, you should implement

Microsoft Teams

Question: 254

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements

Yes

No

Cloud App Security identifies the cloud apps, infrastructure as a service (IaaS), and platform as a service (PaaS) services an organization uses

Cloud App Security detects unusual behavior across apps and users as well as potential ransomware

Cloud App Security prevents data leaks from noncompliant apps and limits access to regulated data.

Answer:

Explanation:

Answer Area

Statements

Yes

No

Cloud App Security identifies the cloud apps, infrastructure as a service (IaaS), and platform as a service (PaaS) services an organization uses

Cloud App Security detects unusual behavior across apps and users as well as potential ransomware

Cloud App Security prevents data leaks from noncompliant apps and limits access to regulated data

Question: 255

A company uses Microsoft 365.

The company requires that you implement least privileged access.

You need to recommend solutions that meet the requirements.

Which two solutions should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Device compliance
- B. IP address range restrictions
- C. Just-in-time (JIT) access
- D. Privileged Access Workstations (PAW) devices

Answer: B,D

Explanation:

Question: 256

A company uses Microsoft 365 for email. The company plans to implement a solution for employees who leave the company

Currently, user Accounts of terminated employees are deleted immediately. Mailbox content for terminated employees must be retained for 90 days and then deleted.

You need to identify solutions that meet the requirements.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Apply a retention policy to the mailbox.
- B. Recover the inactive mailbox.
- C. Restore the inactive mailbox.
- D. Apply a Litigation Hold to the mailbox.

Answer: B,D

Explanation:

Question: 257

Answer: A,C,E

Explanation:

Question: 301

HOTSPOT

A company is evaluating Zero Trust security principles for Microsoft 365.

You need to identify a Zero Trust security principle used in Microsoft 365. Select the answer that correctly completes the sentence.

Answer Area

A Zero Trust security principle that uses segmented access for networks, users, devices, and applications is

verify explicitly assume breach
least privileged access
verify explicitly
shared responsibility model

Answer:

Explanation:

Answer Area

A Zero Trust security principle that uses segmented access for networks, users, devices, and applications is

verify explicitly

Question: 302

A company uses Microsoft 365.

You need to identify the portal that users should use to install Office applications.

What should you identify?

- A. Azure portal
- B. Microsoft 365 user portal
- C. Microsoft 365 admin center
- D. Microsoft Volume Licensing Service Center

Answer: C

Explanation:

Question: 303

HOTSPOT

Instructions: Foreach of the following statements, select Yes if the statement is true Otherwise, select No

NOTE: Each correct selection is worth one point.

Answer Are*

Statements

Yes

No

You can deploy Microsoft 365 Apps for enterprise from a local source by using Configuration Manager

You can deploy Microsoft 365 Apps for enterprise from the cloud by using the Office Deployment Tool

You can deploy Microsoft 365 Apps for enterprise from a local source by O using the Office Deployment Tool

Answer:

Explanation:

Answer Are*

Statements	Yes	No
You can deploy Microsoft 365 Apps for enterprise from a local source by using Configuration Manager		
You can deploy Microsoft 365 Apps for enterprise from the cloud by using * the Office Deployment Tool,		
You can deploy Microsoft 365 Apps for enterprise from a local source by 9 using the Office Deployment Tool.		

Question: 304

DRAG DROP

A company is migrating to Microsoft 365.

The company is evaluating app integrations in Microsoft Teams

Which app integrations should you recommend' To answer, drag the appropriate integrations to the correct features.

Each integration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Integrations	Answer Area
Outgoing webhooks	
Incoming webhooks	How users to send text-based messages to a company's web services.
Connectors	Enables external services to send messages to Teams channels through an HTTP endpoint
Cards	Allows users to subscribe to receive alerts and information from web services

Answer:

Explanation:

Integrations

Outgoing webhooks

Incoming webhooks

Connectors

Cards

Answer Area

Feature

Allows users to send text-based messages to a company's web services.

Enables external services to send messages to Teams channels through an HTTP endpoint.

Allows users to subscribe to receive alerts and information from web services.

Integration

Outgoing webhooks

Incoming webhooks

Connectors

Question: 305

HOTSPOT

Your company uses Microsoft Teams.

Instructions: For each of the following statements, select Yes if the statement is true Otherwise, select No

NOTE: Each correct selection is worth one point.

Answer Area

Statement*

Yes*

No

You can translate a message into another language in Teams

You can use @mentions to notify another user in a channel conversation or in a Teams chat.

You can mark a message as important or urgent in Teams

Answer:

Explanation:

Answer Area

Statements

Yes

No

You can translate a message into another language in Teams.

You can use @mentions to notify another user in a channel conversation or in a Teams chat

You can mark a message as important or urgent in Teams.

Question: 306

A company is evaluating Microsoft 365.

You need to determine the capabilities of Microsoft Viva Insights

What are two features of Microsoft Viva Insights: Each correct answer presents a complete solution NOTE: Each correct selection is worth one point.

- A. General work pattern information about a manager's team.
- B. A dashboard that recommends taking regular breaks throughout the day
- C. A dashboard that uses dynamic cards that can aggregate data from a SharePoint site
- D. Tracking completed recommended learning assigned to a manager's team.

Answer: A,B

Explanation:

Question: 307

A company is evaluating Microsoft's virtualization services. Which feature is unique to Windows 365?

- A. A virtual machine can be provisioned from a custom image.
- B. A virtual machine is automatically provisioned after assigning a license to a user
- C. Users can connect to a virtual machine by using the Microsoft Remote Desktop app
- D. Users can connect to a virtual machine by using a web site.
- E. A virtual machine can authenticate users to Active Directory Domain Services (AD DS).

Answer: B

Explanation:

Question: 308

A company is developing their Windows as a service (WaaS) strategy.

The company wants to roll out the most recently released Windows updates to specific devices before rolling them out to other devices.

You need to recommend the correct feature to meet the requirement.

Which feature should you recommend?

- A. Insider Preview builds
- B. Group policies
- C. Servicing stack updates
- D. Deployment rings
- E. Servicing channels

Answer: D

Explanation:

Question: 309

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Customers can purchase Microsoft 365 and pay monthly using a credit card		
Customers can purchase Microsoft 365 and pay annually using a credit card		
Customers can purchase Microsoft 365 through an Azure Cloud Solution Provider		

Answer:

Explanation:

Answer Area

Statements	Yes	No
Customers can purchase Microsoft 365 and pay monthly using a credit card		
Customers can purchase Microsoft 365 and pay annually using a credit card		
Customers can purchase Microsoft 365 through an Azure Cloud Solution Provider		

Question: 310

A company needs to protect users from malicious URLs and attachments that are in emails. You need to select a solution that meets the requirement. Which service should you select?

- A. Microsoft Cloud App Security
- B. Microsoft Defender for Identity
- C. Microsoft Defender for Office 365
- D. Microsoft Defender for Endpoint

Answer: C

Explanation:

Question: 311

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements

Yes No

Microsoft Cloud App Security is used to block a specific application in a company

Microsoft Cloud App Security provides offerings that prevent confidential information from leaking outside the organization.

Microsoft manages legal requests for a company's data that is in Microsoft Cloud App Security

Answer:

Explanation:

Answer Area

Statements

Yes No

Microsoft Cloud App Security is used to block a specific application in a company

◆

Microsoft Cloud App Security provides offerings that prevent confidential information from leaking outside the organization

•

Microsoft manages legal requests for a company's data that is in Microsoft Cloud App Security

•

Question: 312

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE:

Each correct selection is worth one point.

Answer Area

Statements

Yes

No

You can create inactive mailboxes to retain mailbox content indefinitely

You can use retention policies to verify that a record is deleted

You can use the Label Activity Explorer to search for and view label activity

Answer:

Explanation:

Yes No

You can create inactive mailboxes to retain mailbox content indefinitely • You can use retention policies

to verify that a record is deleted

○ •

You can use the Label Activity Explorer to search for and view label activity

•

Question: 313

A company is evaluating Microsoft 365.

You need to identify applications that are part of Microsoft 365 Apps for enterprise.

Which three applications should you identify? Each correct answer presents a complete solution

NOTE: Each correct selection is worth one point

- A. Microsoft Teams
- B. Microsoft Visual Studio
- C. Microsoft OneNote
- D. Microsoft Excel
- E. Microsoft Project

Answer: C,D,E

Explanation:

Question: 314

A company uses Microsoft cloud services. The company needs to protect against security breaches. You need to follow Microsoft's approach to security. Which approach should you use?

- A. Will never breach security of specific applications
- B. Will never breach the perimeter network
- C. Will never breach security
- D. Will only breach the perimeter network
- E. Will breach security

Answer: E

Explanation:

Microsoft's approach to security is to use a defense-in-depth strategy, which involves multiple layers of security controls to protect the company's data, applications, and infrastructure. These layers can include things like user authentication and authorization, firewalls, malware protection, encryption, and more. By implementing these layers of security, the company can greatly reduce the chances of a successful breach.

Question: 315

Employees of a company are collaborating on a project,

The project manager reports frequent interruptions from team members who request project updates. The project manager wants team members to be able to make and review project updates.

You need to recommend a collaboration solution that allows the team to track individual tasks and overall project

progress.

Which two work management applications should you recommend? (Refer to MS-900: Microsoft 365 Fundamentals Documents or guide at Microsoft.com)

- A. Microsoft Lists
- B. Microsoft Bookings
- C. Microsoft Outlook
- D. Microsoft Planner

Answer: A,D

Explanation:

Microsoft Planner is a task management software that lets you create plans, assign tasks, share files, chat with team members, and get updates on progress².

Microsoft Lists is a list-making app that helps you track information and organize work. You can create lists from templates or from scratch, add columns for different types of data, customize views and filters, and integrate with other Microsoft 365 apps¹.

<https://www.microsoft.com/en-us/microsoft-365/task-management-in-microsoft-365>
<https://www.microsoft.com/en-in/microsoft-365/business/task-management-software>

Question: 316

HOTSPOT

A company is investigating Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements

Yes No

Microsoft To Do integrate with Microsoft Outlook for desktop computer

The Microsoft Planner app can be installed on a mobile device

devices.

Tasks in Microsoft To Do can be viewed from the Microsoft Lists O website.

Answer:

Explanation:

Yes: Microsoft To Do is a task management app that syncs with Outlook Tasks, making it easier to manage all your tasks in one place. You can use the same Microsoft account to sign in to both Microsoft To Do and Outlook, and all tasks are stored on Exchange Online servers¹⁴.

To view your To Do tasks on your Outlook Desktop client or on Outlook.com, you can use the Tasks icon on the bottom left corner of the navigation pane¹. You can also use the My Day view in Microsoft To Do to add tasks you want to accomplish each day².

Yes: Microsoft To Do is a task management app that helps you organize and simplify your plans, whether it's for work, school, or home. You can easily create and sync your task lists across multiple devices so you have your to do list available wherever you go¹.

You can download Microsoft To Do from the App Store for iOS devices, Google Play Store for Android devices, or Microsoft Store for Windows devices²³.

NO: Microsoft To Do and Microsoft Lists are both task management apps that help you track information and organize work.

However, they are not directly integrated with each other. Tasks in Microsoft To Do can be viewed from the Microsoft To Do website¹ or app³, but not from the Microsoft Lists website⁴ or app⁵.

Microsoft Lists is a list-making app that allows you to create lists from templates or from scratch, add columns for different types of data, customize views and filters, and integrate with other

Microsoft 365 apps such as Teams, SharePoint, Power Apps, Power Automate, and Power BI⁴.

<https://todo.microsoft.com/tasks/>

<https://www.microsoft.com/en-US/microsoft-365/microsoft-to-do-list-app>

Question: 317

HOTSPOT

A company is investigating the service-level agreements (SLAs) provided by Microsoft 365. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements

Yes No

The SLA commits to providing 100% uptime and email delivery.

Every Microsoft 365 application has an individual SLA

commit mem

Microsoft offers a service credit if the SLA is not upheld.

1

Answer:

Explanation:

NO: Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft's commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a **99.9% monthly uptime guarantee**¹.

The SLA for Exchange Online, which is the email service in Microsoft 365, states that Microsoft will provide at least 99.9% availability of email delivery within one minute⁴. However, this is an average over a month and not for any one email message. If there is an average delay of greater than 10 minutes over a month, then Microsoft will consider it a breach of the SLA⁴.

NO: Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft's commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a **99.9% monthly uptime guarantee**¹.

However, not every Microsoft 365 application has an individual SLA commitment. Some applications are grouped together under a single SLA, such as Office 365 apps (Word, Excel, PowerPoint, etc.), SharePoint Online, OneDrive for Business, etc.¹. Other applications have their own separate SLAs, such as Dynamics 365 apps (Sales, Customer Service, Marketing, etc.), Azure Active Directory Premium P1/P2 plans¹, etc.

YES: Microsoft offers a service credit if the SLA is not upheld for Microsoft Online Services such as Azure, Dynamics 365, Office 365, and Intune. The service credit is prorated based on the service affected and the duration of the outage¹.

Question: 318

External clients schedule meetings with members of a company.

A user asks for help creating two meetings. The user wants to send a link to clients that will allow them to schedule the meetings with the user.

You need to provide a solution for the user and the clients.

Which application should you recommend?

- A. Microsoft Teams
- B. Microsoft Outlook
- C. Microsoft Bookings
- D. Microsoft Forms

Answer: C

Explanation:

Microsoft Bookings is an application that allows you to create and send a link to clients that will let them schedule meetings with you. You can customize appointment details, booking requirements, and specify service providers to streamline the booking experience for you and your customers². Microsoft Bookings is integrated with your Microsoft 365 calendar to help your customers quickly find available times and avoid double-booking².

Question: 319

A company uses Microsoft 365.

The company requires a survey that must be set up as follows:

- Provide real-time results.
- Support built-in analytics to evaluate responses.
- Be able to export results to Microsoft Excel.

You need to implement a solution. What should you use?

- A. Lists
- B. Forms
- C. Project
- D. To Do
- E. Planner

Answer: B

Explanation:

Question: 320

A company uses Azure Active Directory.

The company requires that authentication requests from client applications that do not support modern authentication are blocked.

You need to identify the policy that meets the requirement.

Which policy should you select?

- A. User risk
- B. Sign-in risk
- C. Multi-factor authentication registration
- D. Conditional Access

Answer: D

Explanation:

Question: 321

A company is evaluating Microsoft Azure Conditional Access policies

You need to determine which scenarios Conditional Access policies support.

Which three scenarios should you select? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Bitlocker deployment
- B. Multi-factor authentication
- C. Blocked access to Microsoft 365 services for unverified users
- D. Hybrid Azure Active Directory joined device
- E. Self-service password reset capabilities

Answer: B,C,D

Explanation:

Question: 322

DRAG DROP

The company has the following requirements for apps in App1:

- Apps must use the same identity to access Azure Storage.
- Users outside the company must be able to access the apps by using their social media identity.

You need to identify the Azure Active Directory (Azure AD) identity solutions.

What should you use? To answer, drag the appropriate identity solution to the correct requirement. Each identity solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE Each correct selection is worth one point.

Identity solutions	Requirement	Identity solution
User-assigned managed identity	App1 identity to access storage	
System-assigned managed identity	Social media identity to access App1	
Azure AD business to business (B2B) identity		
Azure AD business to customer (B2C) identity		

Answer:

Explanation:

Identity solutions	Requirement	Identity solution
User-assigned managed identity	App1 identity to access storage	System-assigned managed identity
System-assigned managed identity	Social media identity to access App1	Azure AD business to customer (B2C) identity
Azure AD business to business (B2B) identity		
Azure AD business to customer (B2C) identity		

Question: 323

A company uses Microsoft 365.

The company requires that you implement solutions for explicit verification.

You need to recommend solutions that meet the requirements.

Which three solutions should you recommend? Each correct answer presents a complete solution.

NOTE Each correct selection is worth one point.

- A. Multifactor authentication (MFA)
- B. Privileged Access Workstations (PAW) devices
- C. Block legacy authentication
- D. Just-in-time (JIT) access
- E. Passwordless authentication

Answer: A,C,E

Explanation:

Question: 324

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Data Loss Prevention policies can prevent users from opening a document that contains sensitive information in SharePoint		
Data Loss Prevention policies can be configured to allow users to override a policy.		
Data Loss Prevention policies can prevent users from sharing sensitive information in a Microsoft Teams channel or chat session.		

Answer:

Explanation:

Answer Area

Statements

Yes

No

Data Loss Prevention policies can prevent users from opening a * document that contains sensitive information in SharePoint

Data Loss Prevention policies can be configured to allow users to ■•• override a policy.

Data Loss Prevention policies can prevent users from sharing ■•• sensitive information in a Microsoft Teams channel or chat session.

Question: 325

HOTSPOT

A company is evaluating security capabilities of Microsoft Sentinel.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statement

Yes

No

The Microsoft cloud native security information event management (SIEM) system receives alerts from a variety of sources and triggers security task processes in response.

The Microsoft cloud native security orchestration automated O O response (SOAR) system collects data from a variety of sources, analyzes the data, and automatically generates alerts m response.

Microsoft Sentinel playbooks can be used to send Microsoft O O Teams chat messages

Answer:

Explanation:

Answer Area

Statement

Yes

No

The Microsoft cloud native security information event management (SIEM) system receives alerts from a variety of sources and triggers security task processes in response.

The Microsoft cloud native security orchestration automated • O response (SOAR) system collects data from a variety of sources, analyzes the data, and automatically generates alerts in response.

Question: 342

DRAG DROP

A company deploys Azure App Services apps in Azure. Users authenticate to the apps by using single sign-on (SSO). The company requires access to the apps from the following types of devices:

- Personal devices that do not require an organizational account to sign in to the device
- Company devices in on-premises Active Directory that are automatically provisioned in Azure Active Directory (Azure AD)

You need to identify how the devices will be provisioned in Azure AD.

What should you use? To answer, drag the appropriate Azure AD device identities to the correct requirements. Each Azure AD device identity may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Azure AD device identities

- ☐ Azure AD joined device
- ☐ Azure AD registered device
- ☐ Hybrid Azure AD joined device

Answer Area

Requirement

- Personal devices
- Company devices

Azure AD device identity

Answer:

Explanation:

Azure AD device identities

- ☐ Azure AD joined device
- ☐ Azure AD registered device
- ☐ Hybrid Azure AD joined device

Answer Area

Requirement

- Personal devices
- Company devices

Azure AD device identity

- ☐ Azure AD registered device
- ☐ Hybrid Azure AD joined device

Question: 343

A company plans to purchase a Microsoft 365 subscription.

The company must license Microsoft 365 software and cloud services for a minimum three-year period.

You need to identify which pricing model supports the licensing requirements.

Which pricing model should you use?

- A. Microsoft Cloud Solution Provider (CSP)
- B. Microsoft Customer Agreement
- C. Microsoft Products and Services Agreement (MPSA)
- D. Microsoft Online Services Program
- E. Microsoft Enterprise Agreement (EA)

Answer: E

Explanation:

Question: 344

A company purchases Microsoft 365 subscription directly.

The company is evaluating various support options that do not have additional costs for Microsoft 365 services. You need to identify which support options are provided at no additional cost.

Which options should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft 365 admin center support request
- B. Microsoft Unified support
- C. Professional Direct Support for Microsoft 365

D. Q&A forums and online help

Answer: A,D

Explanation:

Question: 345

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements

Yes No

Cloud App Security identifies the cloud apps, infrastructure as a service (IaaS), and platform as a service (PaaS) services an organization uses.

Cloud App Security detects unusual behavior across apps and users as well as potential ransomware.

Cloud App Security prevents data leaks from noncompliant apps and limits access to regulated data.

Answer:

Explanation:

Question: 379

HOTSPOT

A company is evaluating Microsoft 365.

You need to determine the correct component to secure.

Select the answer that correctly completes the sentence.

Answer Area

The company needs to secure the front desk workers' corporate phones and computers, which are also known as

endpoints

applications infrastructure identities

Answer:

Explanation:

Answer Area

The company needs to secure the front desk workers' corporate phones and computers, which are also known as endpoints

Question: 380

HOTSPOT

A company is investigating Microsoft 365 threat protection solutions.

You need to identify the services provided by Microsoft Defender.

Which services should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Description	Service
A platform that collects behavioral telemetry including process, kernel, memory, and registry information.	Microsoft Defender for Endpoint Microsoft Defender for Endpoint Microsoft Defender for Office 365 Microsoft Defender for Identity Microsoft Defender for Cloud Apps Microsoft Defender for Office 365 Microsoft Defender for Endpoint Microsoft Defender for Office 365 Microsoft Defender for Identity Microsoft Defender for Cloud Apps Microsoft Defender for Cloud Apps
A platform that has anti-malware, anti-spam and anti-spoofing protection	Microsoft Defender for Office 365 Microsoft Defender for Endpoint Microsoft Defender for Office 365 Microsoft Defender for Identity Microsoft Defender for Cloud Apps Microsoft Defender for Cloud Apps
A platform that identifies, detects, and investigates advanced threats by using correlated Active Directory signals.	Microsoft Defender for Identity Microsoft Defender for Identity Microsoft Defender for Office 365 Microsoft Defender for Identity Microsoft Defender for Cloud Apps
A platform that allows conditional access policies, log traffic analysis, and API connectors to software hosted by third parties	Microsoft Defender for Cloud Aocs Microsoft Defender for Endpoint Microsoft Defender for Office 365 Microsoft Defender for Identity Microsoft Defender for Cloud Apps

Answer:

Explanation:

Question: 381

A company is evaluating Microsoft 365.

You need to identify concepts of using the principle of least privilege. Which two concepts should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Just-enough-access
- B. Just-in-time access
- C. Blocking legacy authentication

D. Microsoft Entra ID multifactor authentication

Answer: A,B

Explanation:

Question: 382

HOTSPOT

A company is planning to implement Teams.

The company requires functionality in Teams that provides the following information:

- a summary of key points of discussions during meetings
- the next steps for meeting participants
- the tasks that are assigned to meeting participants

You need to recommend a solution.

Select the answer that correctly completes the sentence.

Teams capabilities

To provide Teams meeting summaries and identify follow-up steps and tasks, the company should use Copilot

Chatbot

Copilot

Microsoft Power Apps

Microsoft Power Automate

Answer:

Explanation:

Teams capabilities

To provide Teams meeting summaries and identify follow-up steps and tasks, the company should use Copilot

Question: 383

A company plans to migrate to Microsoft 365.

The company prefers to purchase Microsoft licensing in three-year agreements. You need to recommend a pricing model to the company. Which pricing model should you recommend?

- A. Cloud Solution Provider
- B. Enterprise Agreement
- C. Direct Billing

Answer: B

Explanation:

Question: 384

A company wants to improve interaction between users.

The company requires information about collaboration features in Microsoft Excel for Microsoft 365.

You need to identify Excel collaboration features for the company.

Which two features should you identify? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. co-authoring
- B. threaded comments
- C. line focus
- D. mail merge

Answer: A,B

Explanation:

Question: 385

HOTSPOT

A company is reviewing the user subscription licenses (USLs) available in Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Microsoft 365 licensing options

Statement

Yes No

From SA USLs are for new customers who have not previously purchased Microsoft products and services.

Full USLs are for existing Microsoft customers who want to O O upgrade an existing Microsoft 365 service.

Standalone add-on licenses have a different expiration date O than other subscriptions in

Microsoft 365

Answer:

Explanation:

No, Yes, No

"From SA USLs are for new customers who have not previously purchased Microsoft products and services."

Answer : ☒ No

From SA (From Software Assurance) USLs are intended for customers who already have existing Microsoft licenses covered by Software Assurance and want to transition to Microsoft 365. They are not for entirely new customers.

"Full USLs are for existing Microsoft customers who want to upgrade an existing Microsoft 365 service."

Answer : ☒ Yes

Full User Subscription Licenses (Full USLs) are required for customers who do not have any prior qualifying licenses and need a complete Microsoft 365 subscription.

"Standalone add-on licenses have a different expiration date than other subscriptions in Microsoft 365."

Answer : ☒ No

Microsoft 365 standalone add-on licenses typically align with the base subscription's expiration date. Their validity is linked to the primary subscription they are associated with.

Question: 386

HOTSPOT

A company is evaluating Microsoft 365,

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements

Yes No

Microsoft 365 Apps can be deployed with Microsoft Defender for Endpoint.

Microsoft 365 Apps can be deployed from a local network share

: 1

Microsoft 365 Apps can be deployed with Microsoft Endpoint Configuration Manager.

0

Answer:

Explanation:

"Microsoft 365 Apps can be deployed with Microsoft Defender for Endpoint."

Answer : ☒ No

Microsoft Defender for Endpoint is a security solution used for threat protection, not a deployment tool for Microsoft 365 Apps.

"Microsoft 365 Apps can be deployed from a local network share."

Answer : ☒ Yes

Microsoft 365 Apps can be deployed from a local network share using the Office Deployment Tool (ODT), which allows IT administrators to install Office from a shared network location.

"Microsoft 365 Apps can be deployed with Microsoft Endpoint Configuration Manager."

Answer : ☒ Yes

Microsoft Endpoint Configuration Manager (formerly SCCM) is a widely used tool for deploying Microsoft 365 Apps across an organization, allowing centralized management and deployment.

Question: 387

HOTSPOT

A company is evaluating work management tools in Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statement	Yes	No
Microsoft Forms has a built-in ability to send customers an SMS message.	☐	☐
Users without Microsoft accounts can take a survey in Microsoft Forms.	☐	☐
A survey in Microsoft Forms that is owned by a former employee can have the ownership transferred to a Microsoft 365 group.		

Answer:

Explanation:

"Microsoft Forms has a built-in ability to send customers an SMS message."

Answer : ☒ No

Microsoft Forms does not have a built-in feature to send SMS messages. Forms can share surveys via links, email, QR codes, or embedding, but SMS messaging is not a native function.

"Users without Microsoft accounts can take a survey in Microsoft Forms."

Answer : ☒ Yes

Microsoft Forms allows surveys to be shared with external users, including those without Microsoft accounts, if the form is configured to accept responses from "Anyone with the link." "A survey in Microsoft Forms that is owned by a former employee can have the ownership transferred to a Microsoft 365 group."

Answer : ☒ Yes

If a survey is created under a Microsoft 365 Group, it remains accessible even if the original owner leaves. Additionally, IT administrators can transfer ownership of forms from a former employee's account to another user or a group.

Question: 388

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Microsoft 365 billing management

Statement	Yes	No
You can change your billing frequency	☐	☐

When you purchase from a Cloud Services Provider (CSP), the CSP will provide support and have admin access to your tenant.
A company can be invoiced and pay for services by check.

Answer:

Explanation:

"You can change your billing frequency."

Answer : Q Yes

Microsoft allows customers to change their billing frequency (monthly or annually) for Microsoft 365 subscriptions, but changes may depend on the specific plan and payment method.

"When you purchase from a Cloud Services Provider (CSP), the CSP will provide support and have admin access to your tenant."

Answer : Q Yes

When purchasing through a Microsoft Cloud Solution Provider (CSP), the CSP provides support and may have delegated admin access to assist with tenant management unless restricted by the customer.

"A company can be invoiced and pay for services by check."

Answer : X No

Microsoft primarily accepts payments via credit card, bank transfer, and invoices for eligible enterprise customers. Check payments are generally not supported as a direct payment method.

Question: 389

DRAG DROP

A company plans to use Microsoft 365 to deploy devices. The company has the following deployment requirements:

- Sales users must use a deployment process that will customize the out-of-box experience (OOBE) for Windows devices.
- Kiosk devices must use a package that contains all the configurations, settings, and apps that apply to the devices.

The kiosk devices are not connected to the internet.

You need to identify which tool to use to deploy the devices.

Which tool should you use? To answer, drag the appropriate tools to the correct devices. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tool	Answer Area
Windows Autopilot	Device
Windows 365 Business	Sales
Windows 365 Enterprise	Kiosk
Windows Insider Program	
Windows Imaging and Configuration Designer (ICD)	

Answer:

Explanation:

Question: 390

A company plans to implement Microsoft Sentinel.

You need to describe the capabilities of Microsoft Sentinel.

Which two sets of capabilities does it provide? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. numeric score to measure an organization's security posture
- B. security information and event management
- C. security and management of devices, data, and users for managed service providers
- D. security orchestration, automation, and response

Answer: B,D

Explanation:

Question: 391

A company is evaluating Microsoft Entra capabilities.

You need to identify a type of service principal in Microsoft Entra.

Which type can you use?

- A. managed identity
- B. app-only access
- C. delegated access

Answer: B

Explanation:

Question: 392

A company uses Microsoft 365.

The company cancels a subscription that has a traditional add-on associated to it. The add-on has an expiration date that is different than its associated subscription. You need to determine what happens to the add-on. What happens to the add-on?

- A. The add-on will remain until its expiration date is reached.
- B. The add-on is immediately canceled with the subscription.
- C. The add-on will remain until manually canceled by the company.
- D. The add-on will be automatically transferred to another active subscription.

Answer: B

Explanation:

Question: 393

HOTSPOT

A company is evaluating threat protection solutions of Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statement

Microsoft Sentinel only allows for built-in workbooks.

Yes

0

Microsoft Sentinel only allows for built-in correlation rules.

Microsoft Sentinel integrates with Azure Logic Apps.

0

Answer:

Explanation:

Answer Area

Statement

Microsoft Sentinel only allows for built-in workbooks.

Yes

0

No

☒

Microsoft Sentinel only allows for built-in correlation rules.

0

☐

Microsoft Sentinel integrates with Azure Logic Apps.

☒

☐

Question: 394

DRAG DROP

A company is evaluating Microsoft 365 productivity apps.

You need to recommend the Microsoft 365 apps that support productive work.

Match each Microsoft app to its description. To answer, move the appropriate Microsoft app from the column on the left to its description on the right. You may use each Microsoft app once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Microsoft apps

☐ OneDrive
☐ Outlook
☐ PowerPoint

Microsoft app descriptions

Description

Create professional-looking presentations in real-time;

Organize and access files and photos wherever you are.

Perform calendaring and messaging.

Question: 395

HOTSPOT

A company is evaluating Microsoft 365.

You need to determine the Microsoft Viva analytics capabilities.

Select the answer that correctly completes the sentence.

Answer Area

Briefing emails in Microsoft Outlook and the MyAnalytics dashboard are all features of Microsoft

- Viva Insights
- Viva Connections
- Viva Insights
- Viva Learning

Viva Topics

Answer

Explanation:

Answer Area

Briefing emails in Microsoft Outlook and the MyAnalytics dashboard are all features of Microsoft Viva Insights

Question: 396

A company plans to implement Microsoft Defender XDR services in its Microsoft 365 environment.

The company requires that its security solution:

- Assesses the configuration of its internal network shares.
- Assesses browser extension permissions on devices.
- Identifies expiring certificates that are installed on devices.
- Identifies software that is installed on devices.

You need to recommend a security solution. Which Microsoft Defender XDR service should you use?

- A. Defender for Endpoint
- B. Defender for Cloud Apps
- C. Defender for Office 365
- D. Defender Vulnerability Management
- E. Defender for Identity

Answer: D

Explanation:

Question: 397

HOTSPOT

A company is investigating the collaboration solutions in Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Microsoft 365 collaboration solutions

Statement

Yes No

Updates to a user's calendar in Exchange Online automatically become visible in the user's calendar in the Microsoft Teams client

Microsoft Teams audio conferencing allows up to 15,000 phone attendees in a single conference.

A Microsoft Teams Premium license is required to view live captions in different languages during a meeting.

Answer:

Explanation:

Microsoft 365 collaboration solutions

Statement

Yes No

Updates to a user's calendar in Exchange Online automatically become visible in the user's calendar in the Microsoft Teams client.

Microsoft Teams audio conferencing allows up to 15,000 phone attendees in a single conference.

A Microsoft Teams Premium license is required to view live captions in different languages during a meeting.

Question: 398

A company is evaluating the security features in Microsoft 365. You need to recommend the Microsoft 365 apps that help secure data.

Which two apps or services should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Exchange
- B. Microsoft Delve
- C. Microsoft Entra
- D. Microsoft 365 Copilot

Answer: A, C

Explanation:

Question: 399

HOTSPOT

A company uses an on-premises deployment of Configuration Manager to manage its on-premises Windows devices. The

company plans to purchase an Intune subscription and implement comanagement.

You need to describe the benefits of implementing co-management.

Select the answer that correctly completes the sentence.

Co-management benefits

By implementing co-management on its on-premises Windows devices, the company will be able to provide support for Conditional access ^

Real-time actions on devices

Windows Server instances hosted in Azure

Automatic license upgrades from Home to Pro versions

Answer:

Explanation:

Co-management benefits

By implementing co-management on its on-premises Windows devices, the company will be able to provide support for Conditional access ▼

Question: 400

HOTSPOT

A company is preparing a blueprint to launch a new product line.

The blueprint will include a large number of task lists, notes, and tables that must be shared across multiple Microsoft 365 apps.

The company requires generative AI capabilities in Microsoft 365 Apps to accelerate the blueprint development process.

You need to recommend which capability to use.

Select the answer that correctly completes the sentence.

Extend collaboration features of Microsoft 365 Apps with generative AI

To accelerate the blueprint development process for the product launch, the company should use

Microsoft 365 Copilot in Loop ▼

Microsoft 365 Copilot in Loop
