Question: 1

How would Cisco ISE handle authentication for your printer that does not have a supplicant?

- A. ISE would authenticate the printer using 802.1X authentication.
- B. ISE would authenticate the printer using MAC RADIUS authentication.
- C. ISE would authenticate the printer using MAB.
- D. ISE would not authenticate the printer as printers are not subject to ISE authentication.
- E. ISE would authenticate the printer using web authentication.

Answer: C

Question: 2

Which two Cisco ISE use cases typically involve the highest level of implementation complexity? (Choose two.)

- A. Device management
- B. Asset visibility
- C. Software-defined segmentation
- D. Software-defined access
- E. Guest and wireless access

Answer: CD

Question: 3

Which are two Cisco ISE that benefits our customers? (Choose two.)

- A. enables them to set traffic priorities across the network
- B. helps them stop and contain real-time threats
- C. provides network access control
- D. helps them accelerate application deployment and delivery

Answer: BC

Question: 4

Which three key differentiators that DNA Assurance provides that our competitors are unable match? (Choose three.)

- A. Proactive approach to guided remediation
- B. VXLAN support
- C. Apple Insights
- D. Support for Overlay Virtual Transport
- E. Network time travel
- F. On-premise and cloud-based analytics

Answer: ACE

Question: 5

Which element of the Cisco SD-WAN architecture facilitates the functions of controller discovery and NAT traversal?

- A. vManage
- B. vEdge
- C. vBond orchestrator
- D. vSmart controller

Answer: C

Question: 6

Which two statements are true regarding SD-WAN demonstrations? (Choose two.)

- A. As a Cisco SD-WAN SE, you should spend your time learning about the technology rather than contributing to demo innovation.
- B. During a demo, you should demonstrate and discuss what the team considers important details.
- C. During a demo, you should consider the target audience and the desired outcome.
- D. Use demonstrations primarily for large opportunities and competitive situations.
- E. There is a big difference between demos that use a top down approach and demos that use a bottom up approach.

Answer: CE

Question: 7

Which Cisco product were incorporated into Cisco ISE between ISE releases 2.0 and 2.3?

- A. Cisco WSA
- B. Cisco ACS
- C. Cisco ESA
- D. Cisco ASA

Answer: D

Question: 8

What statement is true regarding the current time in Enterprise Networking history?

- A. advent of IoT
- B. pace of change
- C. pervasive use of mobile devices

D. advent of cloud computing

Answer: B

Question: 9

Which Cisco product supports SD-Access and specifically built to address new challenges faced by enterprises?

- A. ASR 1000-HX
- B. ISR 4221
- C. CSRv virtual router
- D. Catalyst 6807-XL w/ Sup6T and C6800 10G line cards
- E. Catalyst 9500
- F. Nexus 7700 w/ Sup2E and M3 line cards

Answer: A

Question: 10

What are the three foundational elements required for the new operational paradigm? (Choose three.)

- A. multiple technologies at multiple OSI layers
- B. application QoS
- C. fabric
- D. assurance
- E. policy-based automated provisioning of network
- F. centralization

Answer: CDE

Question: 11

What are three ways in which Cisco ISE learns information about devices? (Choose three.)

- A. RPC mechanism via HTTPS
- B. RADIUS attributes
- C. network servers the device has accessed
- D. user authentication to the ISE
- E. traffic generated by the device
- F. SMTP agents

Answer: ABE

Question: 12

Which protocol runs between the vSmart controllers and between the vSmart controllers and the vEdge routers, and unifies all control plane functions under a single protocol umbrella?

- A. OMP
- B. BGP
- C. VRRP
- D. IKE
- E. OSPF

Answer: A

Question: 13

Which two primary categories are displayed on the overall health page of the assurance component in the Cisco DNA Center? (Choose two.)

- A. Client
- B. Server
- C. Access-Distribution
- D. Core
- E. Wired
- F. Network

Answer: AF

Question: 14

What is the easiest way to enable SD-Access for all your remote sites after you have your campus SD- Access fabric up and running?

- A. Use a separate fabric domain for each site and use the traditional physical network as the underlay.
- B. Threat all the sites as one fabric domain and use the traditional physical network as the underlay.
- C. Threat all the sites as one fabric domain and use SD-WAN as the underlay.
- D. Use a separate fabric domain for each site and use SD-WAN as the underlay.

Answer: C

Question: 15

Which node enables Cisco ISE to share contextual information on a device with Cisco Stealth watch?

- A. Inline Posture Node
- B. pXGrid Controller
- C. Monitoring and Troubleshooting Node
- D. Policy Administration Node

Answer: B

Question: 16

Which two activities should occur during an SE's demo process? (Choose two.)

- A. identifying which capabilities require demonstration
- B. highlighting opportunities that although not currently within scope would result in lower operational costs and complexity
- C. asking the customer to provide network drawings or white board the environment for you
- D. determining whether the customer would like to dive deeper during a follow -up
- E. leveraging a company such as Complete Communications to build a financial case

Answer: BD

Question: 17

Which are the three focus areas for reinventing the WAN? (Choose three.)

- A. Secure Elastic Connectivity
- B. Centralized device authentication
- C. Application Quality of Experience
- D. Operations
- E. Cloud First
- F. Execution

Answer: ACE

Question: 18

Which option will help build your customers platform during the discovery phase?

- A. POV report
- B. detailed design
- C. high-level design
- D. PO
- E. business case

Answer: E

Question: 19

Which is a function of the Proactive Insights feature of Cisco DNA Center Assurance?

- A. enabling you to quickly view all of the contextual information related to a single user
- B. pointing out where the most serious issues are happening in the network

- C. enabling you to see the complete path of packets from the client to the end application
- D. generating synthetic traffic to perform tests that raise awareness of potential network issues

Answer: D

Question: 20

Which two statements are true regarding Cisco ISE? (Choose two.)

- A. ISE plays a critical role in SD-Access.
- B. ISE can provide data about when a specific device connected to the network.
- C. The major business outcomes of ISE are enhanced user experience and secure VLAN segmentation.
- D. An ISE deployment requires only a Cisco ISE network access control appliance.
- E. Without integration with any other product, ISE can track the actual physical location of a wireless endpoint as it moves.

Answer: AB

Question: 21

Which two activities should occur during an SE's discovery process? (Choose two.)

- A. Gathering information about the current state of the customer 's network environment
- B. Working with the customer to develop a reference architecture
- C. Referencing the PPDIOO model to effectively facilitate the discussion
- D. Establishing credibility with the customer
- E. Mapping Cisco innovation to customer 's needs

Answer: AD

Question: 22

Which two options are primary functions of Cisco ISE? (Choose two.)

- A. allocating resources
- B. enforcing endpoint compliance with network security policies
- C. enabling WAN deployment over any type of connection
- D. automatically enabling, disabling, or reducing allocated power to certain devices
- E. providing VPN access for any type of device
- F. providing information about every device that touches the network

Answer: BF

Question: 23

Which two statements describes Cisco SD-Access? (Choose two.)

- A. an overlay for the wired infrastructure in which traffic is tunneled via a GRE tunnel to a mobility controller

for policy and application visibility

- B. software-defined segmentation and policy enforcement based on user identity and group membership
- C. an automated encryption/decryption engine for highly secured transport requirements
- D. a collection of tools and applications that are a combination of loose and tight coupling
- E. programmable overlays enabling network virtualization across the campus

Answer: BE

Question: 24

Which component of the SD-Access fabric is responsible for communicating with networks that are external to the fabric?

- A. border nodes
- B. edge nodes
- C. control plane nodes
- D. intermediate nodes

Answer: A

Question: 25

Which are two advantages of a “one switch at a time” approach to integrating SD-Access into an existing brownfield environment? (Choose two.)

- A. appropriate for campus and remote site environments
- B. ideal for protecting recent investments while upgrading legacy hardware
- C. involves the least risk of all approaches
- D. allows simplified roll back
- E. opens up many new design and deployment opportunities
- F. allows simplified testing prior to cutover

Answer: AB

Question: 26

Which two options help you sell Cisco ISE? (Choose two.)

- A. Showcasing the entire ISE feature set
- B. Referring to TrustSec as being only supported on Cisco networks
- C. Discussing the importance of custom profiling
- D. Explaining ISE support for 3rd party network devices
- E. Downplaying the value of pxGrid as compared to RESTful APIs

Answer: AD

Question: 27

Which Cisco vEdge router offers 20 Gb of encrypted throughput?

- A. Cisco vEdge 1000
- B. Cisco vEdge 2000
- C. Cisco vEdge 5000
- D. Cisco vEdge 100

Answer: C

Question: 28

Which two statements are true regarding Cisco ISE? (Choose two.)

- A. In distributed deployments, failover from primary to secondary Policy Administration Nodes happens automatically.
- B. ISE can detect endpoints whose addresses have been translated via NAT.
- C. In two-node standalone ISE deployments, failover must be done manually.
- D. ISE supports IPv6 downloadable ACLs.
- E. ISE supports up to 100 Policy Services Nodes.
- F. The number of logs that ISE can retain is determined by your disk space.

Answer: BC

Question: 29

Which three ways are SD-Access and ACI Fabric similar? (Choose three.)

- A. focus on user endpoints
- B. use of Scalable Group Tags
- C. use of overlays
- D. use of group policy
- E. use of Virtual Network IDs
- F. use of Endpoint Groups

Answer: CDE

Question: 30

What should you do if you are looking at a strategic win with a customer and the customer wants to examine Cisco ISE for longer than a few weeks?

- A. Point them to our dCloud demo library.
- B. Give them our ISE YouTube videos.
- C. Set them up with a dCloud account.
- D. Give them some of our flash files that can be played on any browser.

- E. Provide them with a downloadable POV kit.
- F. Set them up with an account on a Cisco UCS server that hosts ISE.

Answer: E

Question: 31

Which two statements regarding Cisco SD-WAN vEdge routers can mitigate DoS attacks against the infrastructure? (Choose two.)

- A. The vEdge routers run on hardened Linux operating systems.
- B. Only authorized controllers are allowed to communicate back to the vEdge router after the vEdge router establishes connection with the controllers.
- C. In case of direct Internet access, the only traffic allowed back is the traffic matching the state table entries on the vEdge router.
- D. Open Certificate Authority and automated enrollment feature.
- E. By default, all incoming traffic is denied at the transport (WAN) side interfaces.

Answer: BC

Question: 32

Which are two Cisco recommendations that demonstrates SDA? (Choose two.)

- A. Use the CLI to perform as much of the configuration as possible.
- B. Keep the demo at a high level.

- C. Focus on business benefit s.
- D. Be sure you explain the major technologies such as VXLAN and LISP in depth.
- E. Show the customer how to integrate ISE into DNA Center at the end of the demo.

Answer: BE

Question: 33

Which feature is supported on the Cisco vEdge platform?

- A. IPv6 transport (WAN)
- B. license enforcement
- C. reporting
- D. non-Ethernet interfaces
- E. single sign-on
- F. 2-factor authentication

Answer: A

Question: 34

Which three options focus of the current digital business era? (Choose three.)

- A. IoT scale
- B. automation
- C. connectivity
- D. centralized enterprise and web applications
- E. Human scale
- F. Virtualized services

Answer: ABF

Question: 35

Which is a benefit of a cloud-based SD-WAN deployment?

- A. instant scale
- B. security never a n issue
- C. agility of change dependent only on your own internal IT processes
- D. controller availability never an issue
- E. might be required for compliance with industry standards

Answer: A
