### Question: 2

A team has been delivering a steady stream of small value increments towards a goal for 4 months, and has completed several solution components, with several still potentially doable. The solution owner examines the reactions to the delivered components from customers, and decides which one(s) the team will do next. The solution owner is demonstrating:

- A. Adaptation to revised strategy
- B. Change in response to feedback and learning
- C. Action in response to activity
- D. Maintenance of solution alignment

**Answer: B**

### Question: 3

The team decides a story is too big to do in one iteration. The correct technique to apply at this point is:

- A. MoSCoW approach
- B. Story decomposition
- C. Epic analysis
- D. Story partitioning

**Answer: B**

### Question: 4

A team discovers that their accomplished deliverables are not impacting the goal strongly. They have

several more iterations of similar work scheduled and are ready to execute, and they expect delivering this work will produce similar poor impacts. They choose to shift their delivery work to a different initiative while they assess the poorly performing work for other ways that would produce good results. This shows that the team values which of the following things highest?

- A. Documenting solution outcomes
- B. Developing new processes
- C. Improving collaboration
- D. Responding to change

**Answer: B**

### **Question: 5**

While discussing team norms, the team determines that within the Delivery Horizon, communication will be:

- A. Clear or reviewed
- B. Appropriate and planned
- C. Casual and as needed
- D. Consistent or scheduled

**Answer: D**

### **Question: 6**

While working at the strategy level, the team needs to ensure stakeholders actively support an environment for constructive communication, collaboration, and continuous improvement. They decide to use the following to achieve this goal?

- A. Product Roadmap
- B. Reviews
- C. Behavior driven development
- D. Release Plans

**Answer: C**

### **Question: 7**

The team is very busy working on a top priority initiative. They have delivered many user stories and have many left to complete. However the components they are delivering are not yet delivering end-to-end business value. How can the team maintain understanding of the big picture without getting lost in the details?

- A. Create a gantt chart
- B. Refine their backlog

- C. Create a story map
- D. Fully elaborate user stories

**Answer: C**

### **Question: 8**

When decomposing stories, the concept of “breadth before depth” signifies progressively breaking down:

- A. Estimates and resources required to accomplish the story
- B. Backlog items to the lowest level of detail upfront
- C. Business goals into user stories representing smaller increments of value
- D. Tests to align with usable functionality delivered through each story

**Answer: C**

### **Question: 9**

The delivery team is in a meeting identifying cycle time improvement opportunities for delivery of the final product. They decide to apply the following technique:

- A. Backlog management
- B. Value stream mapping
- C. Story decomposition
- D. Story mapping

**Answer: B**

Explanation:

Value stream mapping complete, fact-based, time-series representation of the stream of activities required to deliver a product or service.

### **Question: 10**

The team members are discussing the level of effort that different backlog items are likely to require, and how much effort is available for the next sprint. This is an example of the principle:

- A. Analyze to determine what is valuable
- B. Understand what is doable
- C. Respect for individuals
- D. Get real using examples

**Answer: A**

### **Question: 11**

Making decisions based on a realistic understanding of current organizational strengths, capabilities, and challenges, is represented in the agile analysis principle of:

- A. See the whole
- B. Individuals and interactions over process and tools
- C. Think as a customer
- D. Understand what is doable

**Answer: A**

### **Question: 12**

During a team meeting, the team discuss a technique where real or perceived benefits to the customer, direct costs and opportunity costs are assessed. Which technique are they discussing?

- A. Minimum Viable Product
- B. Impact Mapping
- C. Kano Analysis
- D. Value Modeling

**Answer: D**

Explanation:

Value Modelling models value creation for stakeholders who use the solution. Value Modelling is also referred to as Customer Value Model. Value Modelling follows a basic structure: Customer value = Benefits – Cost Benefits can be real (solves a problem or completes a job) or perceived (increases status, reputation, likability).

### **Question: 13**

At the Initiative Horizon, the solution owner using iterative planning principles decides to plan for a period of:

- A. 6-12 months because competitive analysis requires thorough analysis
- B. 1-3 months because it can be determined if needs are being met
- C. 3-6 months because stability is required for long term planning

D. 1-2 weeks because it aligns with the increments delivered by the team

**Answer: B**

### **Question: 14**

Planning horizons are important because they allow an organization to:

- A. Support a structured response supported by all levels of the organization
- B. Sense and respond to their changing environment
- C. Ensure senior management is informed and engaged
- D. Allow management guidance for decision making

**Answer: B**

Explanation:

In constant and rapidly changing environments, organizations are required to be able to sense and respond to local opportunities and problems without the need to involve the whole organization, while also looking forward at emerging threats and opportunities. These planning horizons provide a framework for the shift in focus that occurs when moving between understanding the long-term strategic needs of the organization and the immediate needs of a customer.

### **Question: 15**

The team is creating plans at the Strategy Horizon. Diverse opinions are delaying this effort because different people are focused on different timeframes. After some discussion the team realizes they need to focus their efforts on the following viewpoint:

- A. Business view of the teams working on the initiatives
- B. Micro-view of the potential changes to the organization
- C. Broader view of the impact of the change to the organization
- D. Local view of the effect on the community.

**Answer: C**

### **Question: 16**

The team is expanding and refining customer scenarios as the solution components are being developed. This is an application of the following agile business analysis principle:

- A. Understand what is doable
- B. Avoid waste
- C. Stimulate collaboration and continuous improvement
- D. Get Real Using Examples

**Answer: C**

### **Question: 17**

In situations where learning is frequent and fast-paced, and the product owner is reacting to the new information, the prioritization of solution components should be expected to:

- A. Be unaffected
- B. Remain stable
- C. Alter intermittently
- D. Change frequently

**Answer: D**

### **Question: 18**

While quality checking the written user stories, the team ensures one of the components included in the attributes of a user story is:

- A. The explanation of the story's cost
- B. The stakeholder responsible for testing
- C. The benefit or business value received by the user when the story is implemented
- D. The title describing the goal of the delivery cycle

**Answer: C**

### Question: 23

At the initiative level, solution recommendations incorporate the following:

- A. \*Iteration plan for the start of delivery\*Projected impact to future delivery capability\*Priority of the identified need
- B. \*Ranked goal review\*Impacts on other initiatives\*Time & materials analysis
- C. \*Requirements management plan\*MosCoW feature quadrants\*Analysis of similar plans from the past
- D. \*Validation check on any assumption already made\*Projected impact on identified need\*Estimated costs, including time and money, and others if relevant

**Answer: A**

### Question: 24

The team is discussing one of the six key terms used to discuss both business analysis and its

relationship with common terminology. Specifically, they are describing improvements as being deliberate and achieved through business analysis. This team is discussing the:

- A. Solution
- B. Need
- C. Context
- D. Change

**Answer: D**

Explanation:

Change is the act of transformation in response to a need. Change works to improve the performance of an enterprise. These improvements are deliberate and controlled through business analysis activities.

### Question: 25

A team demonstrating the following characteristics:

- Expects rapid change
  - Incorporates learning & feedback
  - Has a preference for shorter time frames

### Question: 34

In the past, a team has been unable to deliver solutions in a timely manner and they feel this is due to the customer being unable to decide what they want. The team has decided to ask the customer to “sign-off” on their requirements. This violates the following value statement:

- A. Individuals and interactions over process and tools
- B. Prioritizing outputs over outcomes
- C. Working solutions over comprehensive documentation
- D. Customer collaboration over contract negotiation

**Answer: B**

### Question: 35

At the strategy level, a major component of waste can be avoided by ensuring the enterprise:

- A. Only begins an initiative when a budget is approved for all work

- B. Has a shared understanding of organizational goals and priorities
- C. Has changes to existing work approved by senior management
- D. Has comprehensive business cases approved by senior management

**Answer: C**

### Question: 36

The team stops regularly to:

inspect the quality of its outcomes

adapt its processes to more effectively produce outcomes.

This clearly demonstrates the team is working in an:

- A. Retrospective context
- B. Agile context
- C. Waterfall context
- D. Incremental context

**Answer: B**

### Question: 37

The team discusses the agile principle of avoiding waste and decide it's important because it allows the team to:

- A. Verify that the budget is aligned with spending
- B. Focus on items that contribute to satisfying the need
- C. Ensure clear and effective communication
- D. Demonstrate ongoing quality backlog refinement

**Answer: B**
